

## NTE5461 thru NTE5468 Silicon Controlled Rectifier (SCR) 10 Amp

### **Description:**

The NTE5461 through NTE5468 series silicon controlled rectifiers are designed primarily for half-wave AC control applications such as motor controls, heating controls, and power supplies; or wherever half-wave silicon gate-controlled, solid-state devices are needed. These devices are supplied in a TO220 type package.

### **Features:**

- Glass Passivated Junctions and Center Gate Fire for Greater Parameter Uniformity and Stability
- Small, Rugged, Thermowatt Construction for Low Thermal Resistance, High Heat Dissipation, and Durability
- Blocking Voltage to 800 Volts

### **Absolute Maximum Ratings:**
