### Neon Lamps

CML Innovative Technologies line of Neon lamps include, standard wire terminal lamps as well as many based options. Lamps are designed for use at line voltages of 100-125 VAC or 200-250 VAC, and come with or without resistors attached to the lamp. The leads on the lamps can also be cut and formed to custom sizes upon request.

### Footnotes

- Life value is to approximately 50% of initial light output. Values shown apply to use on AC unless otherwise shown. Life on DC is approximately 60% of AC values when DC current is equal to RMS AC value. When equal DC and RMS AC voltages and equal resistances are utilized, life will be approximately the same.
- For DC operation of high brightness lamps use a minimum of 150 circuit volts.  
Maximum initial breakdown voltage 95 VAC, 135 VDC in light.
- Tinned leads.
- High brightness.
- Formed tip.
- Dark effect reduced.
- Lamp drops through a  $\varnothing.310$ " cylinder of .500" minimum length.
