## Switch Mode Power Supply 

## Power Supply Featuring OMRON's Unique, New Undervoltage Alarm Function with Compact Body Contributing to Machine Downsizing

- New undervoltage alarm function assists in determining causes of errors (S8VM- $\square \square \square 24 \mathrm{~A} \square / \mathrm{P} \square$ only).
- Power failure alarm function provides notification of output voltage errors (300-, 600-, and 1,500-W models only).
- Broad range of possibilities with 8 capacities and 29 models to choose from.
- RoHS-compliant
- New, attentive design prevents screws from falling out of terminal block (except for output terminals of 300-, 600-, and 1,500-W models).
- Finger protection prevents electric shock.
- DIN Rail mounting.
- Safety standards: UL508/60950-1/1604, CSA C22.2 No. 14/No. 60950-1/No. 213, EN50178, EN60950-1 (The 300-, 600-, and $1,500-\mathrm{W}$ models will not conform to safety standards if the customer replaces the fan.)
- Conforms to SEMI F47-0200 (when 200-V input is used).
- Harmonic current emissions: Conforms to EN61000-3-2 (except for 15- and 30-W models).

## Model Number Structure

## Model Number Legend

Note: Not all combinations are possible. Refer to List of Models in Ordering Information on page 2.
S8VM-

1. Power Ratings

015: 15 W
030: 30 W
050: 50 W
100: 100 W
150: 150 W
300: 300 W
600: 600 W
152: 1,500 W
2. Output Voltage

05: 5 V
12: 12 V
15: 15 V
24: 24 V
3. Configuration/Functions

None: Open-frame type Standard type
C: Covered type Standard type
A: Covered type Undervoltage alarm type (Sinking)
(See note 2.)
P: Covered type Undervoltage alarm type (Sourcing) (See note 2.)
4. Configuration

None: Bottom mounting type (See note 3.)
D: DIN Rail mounting bracket type

Note: 1. A forced-air cooling method with a fan is used with 300-, 600-, and $1,500-\mathrm{W}$ models.
2. The housing and terminal of the connector for the undervoltage alarm output are provided with the S8VM-05024A $\square / \mathrm{P} \square, \mathrm{S} 8 \mathrm{VM}-$ $10024 \mathrm{~A} \square / \mathrm{P} \square$ and S8VM-15024A $\square / \mathrm{P} \square$.
3. Bottom mounting models cannot be used for front mounting. For a front mounting configuration, use a DIN Rail Mounting Bracket model or Mounting Brackets (sold separately).

## Ordering Information

## List of Models

Note: For details on normal stock models, contact your nearest OMRON representative.

| Configuration | Power ratings | Input voltage | Output voltage | Output current | Bottom mounting |  |  | DIN Rail mounting bracket |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  | $\begin{array}{\|l\|} \hline 1,500 \mathrm{~W} \\ \text { (See note } \\ \text { 4.) } \end{array}$ |  | 24 V | $65 \mathrm{~A}(100 \mathrm{VAC})$ $70 \mathrm{~A}(200 \mathrm{VAC})$ Peak curent: $105 \mathrm{~A}(200 \mathrm{VAC})$ | $\begin{aligned} & \begin{array}{l} \text { S8VM-15224C } \\ \text { (See note 3.) } \end{array} \end{aligned}$ | --- | --- | --- | --- | --- |

Note: 1. No outputs are built into these models.
2. The output capacity of the S8VM-15005 $\square \square$ is 135 W .
3. M8 bolts and nuts for the output terminals are not included with the S8VM-15224C.
4. The $300-600-$, and $1,500-\mathrm{W}$ models use a forced cooling method with built-in fans.
5. To perform front mounting using the bottom mounting models, use the Mounting Brackets (S82Y-VM $\square \square F$, sold separately).

## Specifications

## Ratings/Characteristics

Note: 1. Do not use an Inverter output for the Power Supply. Inverters with an output frequency of $50 / 60 \mathrm{~Hz}$ are available, but the rise in the internal temperature of the Power Supply may result in ignition or burning.
2. Refer to Engineering Data (15-W, $30-\mathrm{W}, 50-\mathrm{W}, 100-\mathrm{W}, 150-\mathrm{W}$ Models) on page 9 to 11 for details.
3. If the output voltage adjuster (V. ADJ) is turned, the voltage will increase by more than $+20 \%$ of the voltage adjustment range. If the adjuster is turned too far, it may activate the overvoltage protection function and interrupt the output.
When adjusting the output voltage, confirm the actual output voltage from the Power Supply and be sure that the load is not damaged.
4. To reset the protection, turn OFF the input power for three minutes or longer and then turn it back ON.
5. Conducted emissions: The noise value is affected by factors such as the wiring method. The Power Supply conforms to Class B when the aluminum plate is laid under the Power Supply. For 15-W models, insert a clamp filter (ZCAT2436-1330 by TDK: $50 \Omega$ min. [ 50 to 500 MHz ], or the equivalent) in the output wire to reduce noise.
6. Radiated emissions: The noise value is affected by factors such as the wiring method. The Power Supply conforms to Class B when the aluminum plate is laid under the Power Supply. For 150-W models, insert a clamp filter (ZCAT2017-0930 by TDK: $35 \Omega \mathrm{~min}$. [ 50 to 500 MHz ], or the equivalent) in the input wire to reduce noise.
7. The weight indicated is for bottom mounting, open-frame models.
8. $A \square$ : Sinking type (NPN)
$\mathrm{P} \square$ : Sourcing type (PNP)
