## 2 <br> TOGGLE SWITCHES

## Military Purpose Toggle Switches

## DESCRIPTION

Eaton's Military Purpose switches are designed to meet the requirements of MIL-S-83731 or J AN-S-23. Sealed Switches have a silicone rubber lever seal assembled between the lever and the bushing to resist the entrance of contaminants such as dust, sand or water into the contact structure.

The switch mechanisms are completely enclosed to resist the entrance of contaminants into the switch. All metal parts are plated to resist corrosion. The Heavy Duty Switches are offered in both Standard Toggle Lever and Lever

Lock versions. Circuit designations are stamped on the side of each switch.
