High speed regulation for micro soldering tools

The Weller WD1000M and WD2000M are an extension of the popular WD1000 and WD1001 soldering stations. This next generation product features a technology that allows the use of the WMRP micro soldering pencil and the new WMRT micro desoldering tweezers. The electronics provide high speed regulation for these new tools, with advanced technology for high reliability and micro electronic applications. In addition, standard Weller soldering tools such as the WP80 80-watt soldering pencil are compatible.

The digital control electronics of the supply unit detect all other Weller electronically controlled soldering tools up to 80W, and automatically set the optimal control parameters for each.

WMRH **I** Ergonomic masterpiece

The WMRH safety rest has been designed with the latest ergonomic considerations in mind. The special geometry of the holder actually relieves the wrist of a substantial amount of strain. The holder can be adjusted with a ball-and-socket joint at the base.

PERFORMANCE

Simple PC Connection

A USB connector on the rear of the station allows data logging, ISO verification and station control via an external PC. Free software is included.

WMRP Soldering Pencil

The small and lightweight construction makes work both easy and comfortable.

Stop and Go Tool Holder

The built-in Stop+Go function in the safety rest reduces the temperature of the tip when the pencil is inserted for longer life.
