Wide Opening Air Gripper

Series MHL2

Parallel Style/ø10, ø16, ø25, ø20, ø32, ø40

How to Order

Refer to p.2.11-1 for auto switch specifications. *Y7BA is applicable to "-X5" oil proof type (p.2.2-6).

Wide Opening Air Gripper Series MHL2

One unit can handle workpieces with various diameters

A large amount of gripping force is provided through the use of a double piston mechanism, while maintaining a compact design

Double end type oil impregnated resin bearings with a metal backing are used for all shafts

Fingers synchronized by a rack and pinion mechanism

Built-in dust proofing mechanism

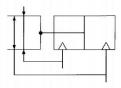

A high degree of freedom for mounting

Auto switch capable

∧Caution

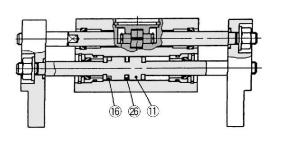

Be sure to read before handling.

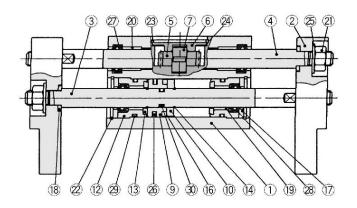

Refer to p.0-20 and 0-21 for Safety Instructions and common precautions on the products mentioned in this catalog, and refer to p.2.0-3 and 2.0-4 for precautions on every series.

If a workpiece is hooked onto the attachment, make sure that excessive impact will not be created at the start and the end of the movement. Failure to observe this precaution may result in shifting or dropping the workpiece, which could be dangerous.

Wide Opening Air Gripper Series MHL2

Setting Method of Auto Switch

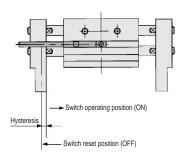

To set the auto switch, insert the auto switch into the switch groove of the air gripper from the direction indicated in the following drawing. After setting the position, tighten the attached switch mounting set screw with a straight bladed watchmakers screwdriver.

Note) Use a watchmakers screwdriver with a grip diameter of 5 to 6mm to tighten the auto switch set screw. Use a tightening torque of 0.05 to 0.1 Nm. As a rough guide, tighten the screw an additional 90° after feeling a tight resistance.

Auto Switch Hysteresis

Auto switch hysteresis is as follows. Please refer to the table as a guide when setting auto switch positions.

Unit: mm

| Auto switch model | D-Y59å D-Y69å | D-Y7NW | D-Y7BWV | D-Y7BA |

Made to Order Specifications

1 Oil proof

MHL2 - Cylinder bore size D Stroke symbol - Solid state switch - X 5

The packing class has been revised to adopt oil-proof materials for using it in an environment with splashing of cut liquid splashing etc.

Specifications

| Туре | Oil proof |
|------------------------|--------------------------------|
| Bore size | ø10, ø16, ø20 ø25, ø32, ø40 |
| Action | Double acting |
| Fluid | Air |
| Material | Sealing, Gascket-Fluoro rubber |
| Applicable auto switch | D-Y7BAL |

Notes) Some liquid may make the use of an air gripper or auto switch impossible.

Confirm the kind of the questionable liquid and consult SMC for the use.

The dimensions are the same as the standard type.

Thermal proof

MHL2 — Cylinder bore size D Stroke symbol — X 4

The packing class has been revised to adopt thermal proof materials for using it at high temperature of up to 100°C.

Specifications

| Туре | Thermal proof |
|-----------|-------------------------------|
| Bore size | ø10, ø16, ø20, ø25, ø32, ø40 |
| Action | Double acting |
| Fluid | Air |
| Material | Sealing, Gasket-Fluoro rubber |

Notes) Items with auto switch can not be manufactured.

The dimensions are the same as the standard type
