## Switch Mode Power Supply 

## Power Supply Featuring OMRON's Unique, New Undervoltage Alarm Function with Compact Body Contributing to Machine Downsizing

- New undervoltage alarm function assists in determining causes of errors (S8VM- $\square \square \square 24 \mathrm{~A} \square / \mathrm{P} \square$ only).
- Power failure alarm function provides notification of output voltage errors (300-, 600-, and 1,500-W models only).
- Broad range of possibilities with 8 capacities and 29 models to choose from.
- RoHS-compliant
- New, attentive design prevents screws from falling out of terminal block (except for output terminals of 300-, 600-, and 1,500-W models).
- Finger protection prevents electric shock.
- DIN Rail mounting.
- Safety standards: UL508/60950-1/1604, CSA C22.2 No. 14/No. 60950-1/No. 213, EN50178, EN60950-1 (The 300-, 600-, and $1,500-\mathrm{W}$ models will not conform to safety standards if the customer replaces the fan.)
- Conforms to SEMI F47-0200 (when 200-V input is used).
- Harmonic current emissions: Conforms to EN61000-3-2 (except for 15- and 30-W models).

Note: Refer to Safety Precautions on page 32.

## Model Number Structure

## Model Number Legend

Note: Not all combinations are possible. Refer to List of Models in Ordering Information on page 2.
S8VM- $\qquad$

1. Power Ratings

015: 15 W
030: 30 W
050: 50 W
100: 100 W
150: 150 W
300: 300 W
600: 600 W
152: 1,500 W
2. Output Voltage

05: 5 V
12: 12 V
15: 15 V
24: 24 V
3. Configuration/Functions

None: Open-frame type Standard type
C: Covered type Standard type
A: Covered type Undervoltage alarm type (Sinking)
(See note 2.)
P: Covered type Undervoltage alarm type (Sourcing) (See note 2.)
4. Configuration

None: Bottom mounting type (See note 3.)
D: DIN Rail mounting bracket type

Note: 1. A forced-air cooling method with a fan is used with 300-, 600-, and $1,500-\mathrm{W}$ models.
2. The housing and terminal of the connector for the undervoltage alarm output are provided with the S8VM-05024A $\square / \mathrm{P} \square, \mathrm{S} 8 \mathrm{VM}-$ $10024 \mathrm{~A} \square / \mathrm{P} \square$ and S8VM-15024A $\square / \mathrm{P} \square$.
3. Bottom mounting models cannot be used for front mounting. For a front mounting configuration, use a DIN Rail Mounting Bracket model or Mounting Brackets (sold separately).

## Ordering Information

## List of Models

Note: For details on normal stock models, contact your nearest OMRON representative.

Note: 1. No outputs are built into these models.
2. The output capacity of the S8VM-15005 $\square \square$ is 135 W .
3. M8 bolts and nuts for the output terminals are not included with the S8VM-15224C.
4. The $300-600-$, and $1,500-\mathrm{W}$ models use a forced cooling method with built-in fans.
5. To perform front mounting using the bottom mounting models, use the Mounting Brackets (S82Y-VM $\square \square F$, sold separately).

|  |  | SEMI | SEMI F47-0200 (200-VAC input) |  |  |
|  | Weight |  | 1,100 g max. | 1,700 g max. | 3,800 g max. |

Note: 1. Do not use an Inverter output for the Power Supply. Inverters with an output frequency of $50 / 60 \mathrm{~Hz}$ are available, but the rise in the internal temperature of the Power Supply may result in ignition or burning.
2. Refer to Engineering Data ( $300-\mathrm{W}, 600-\mathrm{W}, 1,500-\mathrm{W}$ Models) on page 15 to 17 for details.
3. If the output voltage adjuster (V. ADJ) is turned, the voltage will increase by more than $+20 \%$ of the voltage adjustment range. If the adjuster is turned too far it may activate the overvoltage protection function and interrupt the output. When adjusting the output voltage, confirm the actual output voltage from the Power Supply and be sure that the load is not damaged.
4. To reset the protection, turn OFF the input power for three minutes or longer and then turn it back ON. Alternatively, turn OFF the remote control signal and then turn it back ON again.
5. Conducted emissions: The noise value is affected by factors such as the wiring method. The Power Supply conforms to Class B when the aluminum plate is laid under the Power Supply. For 600-W models, insert a clamp filter (ZCAT3035-1330 by TDK: $100 \Omega \mathrm{~min}$. [ 50 to 500 MHz ], or the equivalent) in the input wire, and ring core (HF60T38X14X22 by TDK: $16 \Omega$ typ. [ 1 MHz ], $46 \Omega$ typ. [ 10 MHz ], or the equivalent) in the output wire to reduce noise
6. Radiated emissions: The noise value is affected by factors such as the wiring method. The Power Supply conforms to Class A when the aluminum plate is laid under the Power Supply ( $1,500-\mathrm{W}$ models).
7. The measuring method conforms to JEITA standard RC-9131A. Refer to Ripple under Safety Precautions on page 32
8. The Power Supply will not conform to safety standards if the customer replaces the fan.

## S8VM-15224C (1,500 W)
