

Material

The solder retention devices (SMT anchors) provide an reinforced), self extinguishing UL 94, V-0, color grey exceptionally high retention force for the terminal **Temperature limits:** block to the PCB. The most significant benefit of this **Short Time:** 140°C (284°F) design is the protection it provides to the solder joints Continuous: RTI 105°C (221°F) against stresses encountered in field-installations. This Low Limit: -40°C (-40°F) is the strongest SMT retention method in the industry. Comparative Tracking Index: CTI > 600 The anchoring element constitutes a Universal SMT Oxygen Index Rating: 33% retention method (can be licensed for other **Solder Pin:** 1 x 1 mm (0.04 x 0.04 in.), Tin plated applications). It eliminates completely CTE mismatch copper alloy (Coefficient of thermal expansion) and provide total coplanarity (contains position adapting pin) The 120-M-227-SMD is also equipped with keyed pick-cap that ensures "Poka-Yoke" functionality in conjunction with automated vision system. Header Plug-In Direction Perpendicular to PCB and Wire Entrance Parallel to PCB when plugged with 120-D-111, 120-D-121 • Plug-In Direction and Wire Entrance Perpendicular to PCB when plugged with 120-A-111 Typical pull off forces: 50 kg per module (depending) on soldering process). • Typical peel off forces: 30 kg per module (depending on soldering process). **Technical Data** Center to Center Spacing: 5 mm (0.197 in.) Tape & Reel technical information

Table # 1	5 mm pitch Surface Mount (SMT) connectors with	5 mm pitch Surface Mount (SMT) connectors with anchoring elements for automatic handling		
Genuine SMT termin	nal block of elevator style with SM anchoring elements:	140-A-524-SMD ¹		
Genuine SMT heade	er with SM anchoring elements:	120-M-227-SMD ²		

NOTES:

1. All Surface Mount connectors are equipped with pick cap device for automatic handling.

Two laterally SMT installed anchors will add 2^s mm = 10 mm length to the connector length.
In order to compute total length of connector equipped with 2 anchors, add 10 mm to the connector length without anchors.

4. The spacing between one anchor and adjacent pole is 5 mm.

EXAMPLE: (see table 3) The length of a 4 poles connector of 5 mm pitch wit two anchors is: 4*5 + 2*5 = 30 mm

Immediately available Transfer Tube carriers for 5 mm pitch SMT connectors for automatic handling Table # 2 Genuine SMTterminal block of elevator style with SM anchoring elements: 140-A-524-SMD

EXPLANATORY NOTES FOR REEL SIZE:

* Typical product quantity packed in tape & reel is 200 - 300 parts per reel.

* Quantities per reel depend of the product shape, reel's hub diameter, reel's overall diameter, the amount of empty pockets in the trailer, weight limitations and other considerations.

* As shown in table # 3 the most popular sizes for Tape & Reel are: 44 mm and 56 mm.
* WECO builds customized Tape & Reels addressing accomodation of two or more similar products into the same cavity.

* The trailer is the last end out of the reel. It is inside near the hob and typically 160 mm (6 in.) long. The leader is the first end out of the reel. It is on the

outside of the reel and typically 390 mm (15 in.) to 560 mm (22 in.) long. * Double or triple row reels can be developed if requested

GENERAL RULE FOR TAPE WIDTH:

Depending on shape a narrower tape may be adequate or a wider tape may be required.

* Depending on pocket design draft angle is required. * 44 mm and 56 mm tapes tend to be practical.

* 44 mm and 56 mm loaders are usually easily available and connectors fit well into these.

* Appliers to deep embossed, adhesive sealed carrier tape and to mechanically interlocked tape.

* Tape width shall be chosen as per the table # 6 (ANSI/EIA-481-C, Table 3):

Table # 6	Pocket width
Tape Size (mm)	W max (mm)
24	20
32	23
44	35
56	46
72	60
88	76
104	91
120	107
136	123
152	139
168	153
184	169
200	185

Examples of computing:

* 5 poles connector --> 35 mm length, W = 35 mm, which fits within Wmax 46 mm, from here Tape Size = 56 mm.

* 8 poles connector --> 50 mm length, W = 50 mm , which fits within Wmax 60 mm, from here Tape Size = 72 mm. *10 poles connector --> 60 mm length, W = 60 mm , which fits within Wmax 76 mm, from here Tape Size = 88 mm.
