Model #: SNMPWEBSOLO

Power Management Tools - External SNMP/Web Card Module

Highlights

- External SNMP/Web management accessory card module
- Simple installation and setup

Description

Tripp Lite's SNMPWEBSOLO allows network users to operate any Tripp Lite SmartPro UPS System equipped with a DB9 port as a managed device on the network. Enables remote monitoring and control of UPS and site electrical conditions using SNMP network management platform or a web browser. Provides remote viewing of site electrical data, UPS status information and self-test logs. Supports selective rebooting of locked network equipment without disrupting power to other devices when used with Customized Load Management Receptacles available on select Tripp Lite UPS systems. Optional ENVIROSENSE module provides remote temp/humidity monitoring and a dry contact interface to control and monitor alarm, security and telecom devices.

Applications

- Ideal for the remote management and control of UPS and power data in LAN/WAN racks, computer rooms and datacenter environments.

Package Includes

- SNMPWEBSOLO
- Software CD
- Manual

Features

- Makes any Tripp Lite SmartPro UPS System equipped with a DB9 port a managed device on the network, controllable using SNMP network management platform or a web browser
- Enables remote UPS monitoring and control in racks, computer rooms and datacenter environments
- Provides remote viewing of current site electrical data, UPS self-test and alert logs, as well as logged power events such as blackouts, brownouts, overvoltages and other electrical problems
- Offers the ability to control UPS output power and remote-reboot of locked network devices without interrupting power to other loads when used with any Tripp Lite UPS equipped with Load Management Receptacles
- 2 year product warranty
