# Half-pitch Low-profile Stacking Connectors

#### An Integrated Male/ Female Half-pitch **Board-to-Board Stacking Connector.**

- Board space can be adjusted from 5 to 11 mm in 1-mm increments. (5 to 9 mm in 1-mm increments for SMT versions.)
- The product line includes Through-hole and Surface-mounted Terminals (SMT) Connectors.
- The leaf contact construction resists bending
- All models incorporate fastening pins to secure the terminals, thus preventing floating or falling over during soldering.
- The XH4A conforms to EN, IEC, UL (file no. E103202), and CSA (file no. LR62678). (SMT Connectors not included)

Through-hole Terminals	al 32 a3,	(bottom view)
SMT Terminals	al.a2.a3.  al.a2.a3.  All al.a2.a3.  Reference	(top view)

Note: 1. The triangular mark (▼) and contact numbers are not printed on the connectors. Use the raised reference point used to prevent reverse insertion as a guide when designing boards.

- 2. On the mating side, the row of terminals on the raised reference point side are called row a, and the row on the other side is called row b. The numbers are in the order shown.
- 3. XH4A Half-pitch Connectors are integrated male/female connectors. The contact numbers on row a correspond to the contact numbers on row b. Be careful when using these connectors because they function slightly differently from separate male and female connectors (i.e., Plugs and Sockets).

## **Precautions**

#### **■** Correct Use

### **PCB** settings

XH4A Half-pitch Connectors are male/female connectors with integrated plugs and sockets.

Refer to "Contact Numbers" in the "Engineering Data" section above when designing boards.

#### **Mating Compatibility**

XH4 Half-pitch Connectors do not mate with XH2 or XH3 Half-pitch Connectors.

#### **Soldering Conditions**

#### Straight DIP Terminals (Automated Soldering)

- 1. Soldering temperature: 230±5°C
- 2. Continuous soldering time: Within 3 s

Be sure to wash the board after automated soldering is completed.

#### **SMT Terminals**

- 1. Recommended reflow conditions:
- 2. Pre-heat temperature: 150±10°C
- 3. Pre-heat time: 60 to 120s
- 4. Soldering temperature: 200 to 240°C
