

Enhanced Performance (1-20 Amp) Compact RFI Filter IEC Connector Package

EEJ Series

UL Recognized
CSA Certified
VDE Approved*

EEJ Series

The new EEJ series is the next generation of power inlet filters. The 1-15 amp versions are flange mounted and mechanically equivalent to the EEA/EEB series. The performance has been enhanced to meet the needs for more attenuation. The EEJ series also has an extended metal flange around the socket for improved high frequency EMI shielding as well as a larger contact area for the panel ground.

The EEJ series also includes a 20 amp version that uses the inlet IEC 320/C20. This product was designed to keep up with the demand for higher current equipment. Applications include higher current power supplies and computing equipment, which consist of work stations, base stations, servers, etc.

*15EEJ - VDE rated at 10 amps, 250 VAC
20EEJ - VDE rated at 16 amps, 250 VAC

Electrical Schematic

Resistor location for reference only.

Specifications

Maximum leakage current, each line-to-ground
 @ 120 VAC 60 Hz: .22 mA
 @ 250 VAC 50 Hz: .38 mA

Hipot rating (one minute):
 line-to-ground 1500 VAC
 line-to-line 1450 VDC

Operating frequency: 50/60 Hz

Rated voltage (max.): 250 VAC

Minimum insertion loss in dB:
