- INPUT OFFSET CURRENT 1.5nA 2nA
- SLEW RATE AS INVERSING 10V/ μ s 10V/ μ s
AMPLIFIER

DESCRIPTION

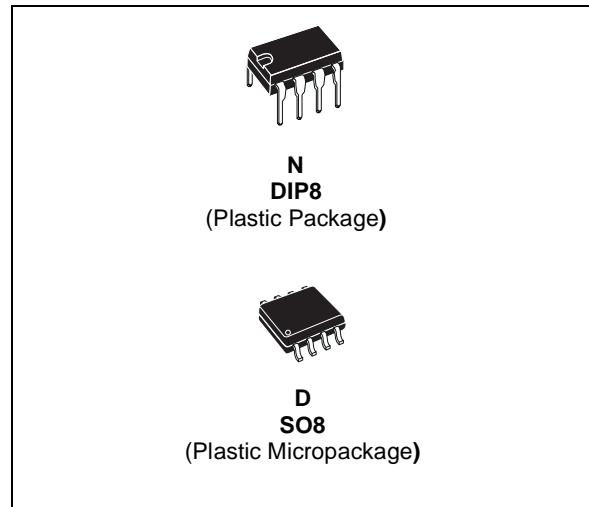

The LM101A is a general purpose operational amplifier which offers many features: supply voltages from $\pm 5V$ to $\pm 22V$, low current drain, overload protection on the input and output, no latch-up when the common-mode range is exceeded, free from oscillations and compensation with a single 30pF capacitor. It has advantages over internally compensated amplifiers in that the compensation can be tailored to the particular application: slew rate of 10V/ μ s and bandwidth of 3.5MHz can be easily achieved.

ORDER CODE

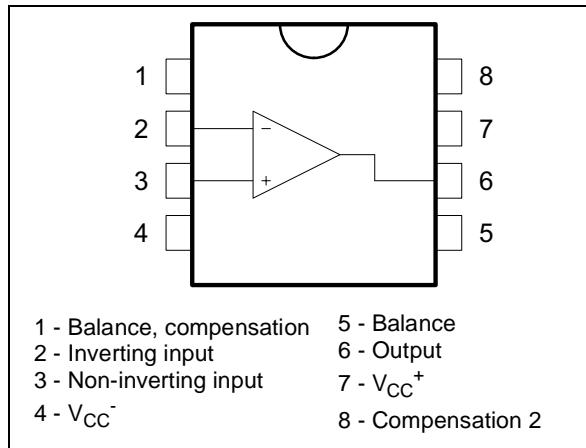

Part Number	Temperature Range	Package	
		N	D
LM101A	-55°C, +125°C	•	•
LM201A	-40°C, +105°C	•	•
LM301A	0°C, +70°C	•	•
Example : LM201AN			

N = Dual in Line Package (DIP)

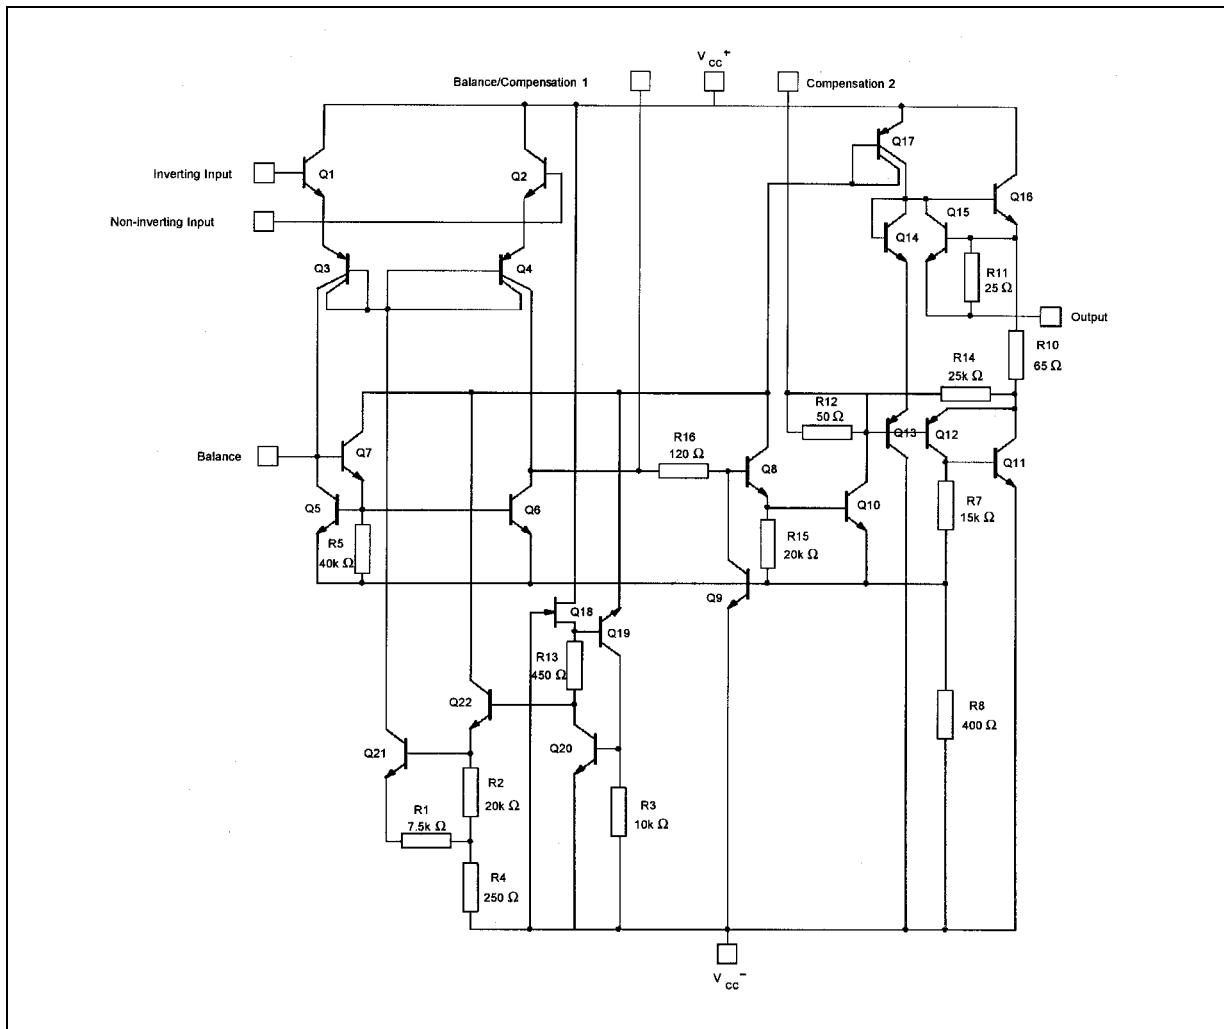

D = Small Outline Package (SO) - also available in Tape & Reel (DT)

PIN CONNECTIONS (top view)
