

High voltage NPN power transistor

Features

- High voltage capability
- High DC current gain
- Minimum lot-to-lot spread for reliable operation

Applications

- Switching mode power supply
- Battery charger

Description

The device is manufactured using high voltage multi epitaxial planar technology for high switching speeds and high voltage withstand capability. The device is designed for use in SMPS and battery charger.

3 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
