## SDN-P Series Power Supply (Single and Three Phase Units, 60-960 Watts)

The SDN DIN Rail power supplies provide industry leading performance. Sag Immunity, transient suppression and noise tolerant, the SDN series ensures compatibility in demanding applications. Power factor correction to meet European directives, hazardous location approvals and optional redundant accessories allow the SDN series to be used in a wide variety of applications. Wide operation temperature range, high tolerance to shock and vibration and reliable design make the SDN series the preferred choice of users everywhere.

## Features

- Power Factor Correction (per EN61000-3-2)
- Auto Select $115 / 230 \mathrm{Vac}, 50 / 60 \mathrm{~Hz}$ Input
- Single Phase models meet SEMI F47 Sag Immunity
- Class 1, Div 2 Hazardous Locations
- ATEX approval on 2.5 through 10A, 24 Vdc Single Phase Models
- Improved metal mounting clip
- DC OK Signal
- Adjustable Voltage
- SDN10-24-100P New Compact width (3.26")
- Parallel Capability standard on all units
- Industrial grade design
$-10^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$ operation without derating. Indefinite short circuit, overvoltage and overtemperature protection.
- Powers high inrush loads without shutdown or foldback
- Rugged metal case and DIN connector
- 

SDN2.5-24-100P and SDN4-24-100LP meet NEC Class 2
Narrow width on rail for space critical applications

- User-friendly front panel.
- Large, rugged, accessible, multiple connection screw terminations
- Easy installation
- Broad range (2.5 A through 40 A ) of product to fit almost any application
- Single and three phase inputs available

- 12 Vdc and 48 Vdc single phase models available NEW
- Highly efficient $>90 \%$ switching technology
- High MTBF and reliability
- Five year warranty
- RoHS compliant

## Related Products

- SDP Series
- SFL Series
- SCP Series
- SCL Series
- SDU UPS

## Applications

- Industrial/Machine control
- Process Control
- Material Handling
- Conveying Equipment
- DeviceNet ${ }^{T M}$

Accessories

- Chassis Mount Bracket (SDN-PMBRK2)
Specifications (Single Phase), 24 Vdc Output © тop

## Notes

1. For the SDN 20-24-480C, single phase input is permissible, but output is derated to $75 \%$ ( $15 \mathrm{Amps} @ 24 \mathrm{Vdc}$ ).
2. Not UL listed for DC input.
3. Input current ratings are conservatively specified with low input, worst case efficiency and power factor.
4. Losses are heat dissipation in watts at full load, nominal input line.
5. Ripple/noise is stated as typical values when measured with a 20 MHz , bandwidth scope and 50 Ohm resistor.
6. Full load, 100 Vac Input @ $\mathrm{T}_{\mathrm{amb}}=+25^{\circ} \mathrm{C}$
7. For the SDN 40-24-480, output: one (+) two (-) connectors, size range 16-5 AWG ( $1.5016 \mathrm{~mm}^{2}$ ) solid conductor.

- Using the optional SDN-PMBRK2 accessory, the unit can also be screwed onto plane surfaces (without DIN Rail).

## Detachment from DIN Rail:

Press button downwards (to unlock) and remove the unit from the DIN Rail.
