## Fluke 50 Series II Thermometers

**Laboratory accuracy.  
Wherever you go.**

The new Fluke 50 Series II contact thermometers offer fast response and laboratory accuracy (0.05% + 0.3°C) in a rugged, handheld test tool.

| Model Name  | Description                                                                                                                                                                                      |  |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Fluke 51 II | <b>Single Input Digital Thermometer including:</b> <ul style="list-style-type: none"> <li>• Impact absorbing holster</li> <li>• One 80PK-1 bead probe thermocouple</li> </ul>                    |  |
| Fluke 52 II | <b>Dual Input Digital Thermometer including:</b> <ul style="list-style-type: none"> <li>• Impact absorbing holster</li> <li>• Two 80PK-1 beaded probe thermocouples</li> </ul>                   |  |
| Fluke 53 II | <b>Single Input Digital Thermometer with data logging including:</b> <ul style="list-style-type: none"> <li>• Impact absorbing holster</li> <li>• One 80-PK-1 bead probe thermocouple</li> </ul> |  |
| Fluke 54 II | <b>Dual Input Digital Thermometer including:</b> <ul style="list-style-type: none"> <li>• Impact absorbing holster</li> <li>• Two 80PK-1 bead probe thermocouples</li> </ul>                     |  |
