## Flat Cable Connectors for PCBs XG2

## Ideal for high-density mounting. IDC design allows for quick termination.

- Part of a total flat cable wiring solution, when used in conjunction with XG4, XG5 and XG8 sockets and plugs.
- End terminates cable to a PCB or acts as a pass through for connection to other cables or PCB's.
- Uses a standard $2.54-\mathrm{mm}$ grid terminal arrangement for easier design of circuits.
- Terminal Arrangement: standard or reverse.
- Uses UL94V-0 approved insulation material.

- IDC Assembly Tools are available.

## Terminal Arrangement

The contact numbers are not marked on the Connector. If the cables are numbered from 1 starting from the edge, the relationship between the wires and the terminals would be as shown below.

## Precautions

## Correct Use

## Handling

- There is no Strain Relief for the PCB Connector. Leave enough slack to avoid tension on the cable.
- Terminals can be press fit no matter which direction the base and cover are facing
- See "XG $\square$ - Assembly Tooling and Accessories" datasheet for information on flat cable / connector assembly tools.

## Automated Soldering Conditions (Jet Flow)

1. Soldering temperature: $250 \pm 5^{\circ} \mathrm{C}$
2. Continuous soldering time: Within 5 s
