

Generic photo of the product

Main technical characteristics of this part number

Supply voltage	DC 24 V
I/O number	12
Discrete inputs	8 I
Input voltage	DC 24 V
Outputs	4 relay O
Clock	Yes
Analog inputs 0-10 V	4 E
Display and keys	With

Generic description of the product

Zelio Logic SR2-SR3 compact smart relay
<p>Zelio Logic smart relays are designed for use in small automated systems. They are used in both industrial and commercial applications.</p> <p>For industry: automation of small finishing, production, assembly or packaging machines,decentralised automation of ancillary equipment of large and medium-sized machines in the textile, plastics and materials processing sectors, automated systems for agricultural machinery (irrigation, pumping, greenhouses, ...).</p> <p>For the commercial/building sectors: automation of barriers, roller shutters, access control, automation of lighting installations, automation of compressors and air conditioning systems.</p> <p>Their compact size and ease of setting-up make them a competitive alternative to solutions based on cabled logic or specific cards.</p> <p>Simple programming, ensured by the universal nature of LADDER and function block diagram FBD languages, meets all automation requirements and also the needs of the electrician.</p> <p>Compact smart relays are suitable for simple automated systems, up to 20 I/O.</p>
