

Tone & Probe Plus Cable Check™

Part number: 1573

Description

Identify connector & cable pin-out with true cable mapping for both patch cords and installed cables. Also perform full-range continuity testing, line condition, signal tracing & wire identification with tone generator and tone probe cable tracer.

Features

- RJ45 LAN Cable-Check™ mode is a true cable mapper that identifies:
 - Open, crossed and shorted connections
 - Connector and cable pin-out
 - Clear LED display for each pin and shield
 - Shielded RJ45 modular plug socket
- Features automatic display of mapping with dual speeds: slow or fast
- Telephone Test Set & Tone Probe Cable Tracer:
 - Check polarity of telephone power line
 - View telephone line status: dial tone, ringing line or busy line
 - Provides talk power for telephone lines & butt set use
 - Selectable dual/single tone application for balanced & unbalanced circuits

- Four tone generator patterns
- Tests continuity of wires, cables & loads
- Tone generator features auto-off function
- Locate patch and termination point of wire
- Quickly identify cable pair carrying signal
- Inductive, high sensitivity probe
- Jack for headset
- Audible speaker with adjustable volume control enables use without a headset

Advantages

- Includes 2 RJ45 shielded patch cords, RJ11 cord with alligator clips, 2 9V batteries & durable, nylon carrying case with belt loop
