Product Information		
Product Type:	Fuse	
Product Family:	Electrical Power	
Upgrade Product:	LPS-RK-40SP	
Brand:	Cooper Bussmann	
Sub-brand:	Fusetron	
Class:	RK5	

Recommended Products Rec. Fuse Block: R60060 Series Rec. Cover: SAMI-5 Series

Physical Properties

Dimensions: 5.5in.(L) \times 1.06in.(W) \times 0in. (H)

Certifications

UL Listed

CSA Certified

Electrical Properties		
Maximum AC Voltage:	600	
Maximum DC Voltage:	300	
Amperage Rating:	40	
AC Interrupting Ratings:	• 200000 at 600V	
DC Interrupting Ratings:	• 20000 at 300V	
Fuse Class:	Class RK5	
Time Delay:	Yes	

Fusetron® Dual-Element, Time-Delay Fuses Class RK5 – 600 Volt

FRS-R 1/10-60A

Dimensional Data

Catalog Symbol: FRS-R

Dual-Element, Time-Delay – 10 second (minimum) at 500%

rated current Current-Limiting

Ampere Rating: 1/10 to 60A Voltage Rating: 600Vac (or less)

Interrupting Rating: 200,000A RMS Sym.

dc Ratings (20,000AIC @ 250Vdc)

Agency Information:

UL Listed, Std. 248-12, Class RK5, Guide JDDZ, File E4273 CSA Certified, C22.2 No. 248.12, Class 1422-02, File 53787

General Information:

- Provides motor overload, ground fault and short-circuit protection. When used in circuits subject to surge currents such as those caused by motors, transformers and other inductive components, these fuses can be sized close to full-load amperes to give maximum overcurrent protection.
- Permits the use of smaller and less costly switches. The timedelay feature makes it possible to use fuse ampere ratings which are much smaller than those of non-time-delay fuses. Considerable cost saving occurs by permitting the use of smaller size switches, panels and fuses themselves.
- Provides a higher degree of short-circuit protection (greater current-limitation) in circuits in which surge currents or temporary overloads occur.
- · Helps protect motors against burnout from overloads.
- Gives motor running back-up protection to motors without extra costs.
- Helps protect motors against burnout from single phasing on three phase systems.
- Simplifies and improves blackout prevention (selective coordination).
- Dual-element fuses can be applied in circuits subject to temporary motor overloads and surge currents to provide both high-performance, short-circuit and overload protection.
- The overload element provides protection against low level overcurrent of overloads and will hold an overload which is five times greater than the ampere rating of the fuse for a minimum of ten seconds.

Fuse Reducers For Class R Fuses

Equipment Fuse Clips	Desired Fuse (Case) Size	Catalog Number (Pairs) 600V
60A	30A	No. 663-R
100A —	30A	No. 216-R
100A —	60A	No. 616-R
200A	60A	No. 626-R
