

Model #: SU30K3/3XR5

SmartOnline 3-Phase UPS System - 3-Phase on-line, double-conversion protection for mission critical applications

Highlights

- 30,000 VA (30kVA) EXTENDED RUNTIME tower UPS with internal batteries
- Saves valuable space: power and battery components combined into a single small-footprint module
- Simplifies runtime scalability: convenient front panel battery access for expandable runtime with additional internal battery packs
- 3-phase hardwire input and output (120/208VAC). Wide input voltage correction range (96 - 144V AC / 166 - 250V AC)
- IGBT technology and zero transfer time, on-line, double-conversion operation
- 3 communication ports, SNMP card slot and EPO jack

Description

Tripp Lite's SU30K3/3XR5 30kVA SmartOnline 3-Phase Intelligent, True On-Line Extended Runtime UPS System has been redesigned to save valuable space and simplify runtime scalability. Power and battery components are combined into a single, small-footprint module (the smallest in its class). A robust internal battery runtime capability can be easily extended by installing additional optional internal battery packs through the convenient front panel access door. The SU30K3/3XR5 features a large internal battery compartment that contains more internal batteries than the equivalent standard-run model (SU30K3/3) and more space to add additional optional internal battery packs to extend runtime.

The SU30K3/3XR5 provides mission critical equipment with the highest level of power protection available. Large capacity 30,000VA/24,000 watt UPS continually converts incoming AC power into filtered DC power, and then resynthesizes it back into AC power with a pure sine wave. Perfectly regulated, continuous sine wave output with zero transfer time offers compatibility with all equipment types. IGBT inverter technology produces output power with <3% THD (total harmonic distortion), allowing connected equipment to perform at its peak. A 3:1 crest factor safely supports a variety of equipment, even those with wildly-fluctuating power demands. Extremely efficient operation saves money by lowering electricity consumption. Hardwire input and output connections support a variety of permanent or PDU style power connections. SU30K3/3XR5 features 120/208V AC, 3-phase, 4-wire (plus ground), wye input and output. It also features a wide input voltage correction range: 96 -144/166-250V AC. Frequency is 50 or 60 Hz (auto-selectable). SU30K3/3XR5 includes internal power and battery components in a single small-footprint tower module. Battery support can be extended with additional internal battery packs. A manual bypass switch as well as an automatic bypass function ensure 100% availability of connected equipment by safely passing through AC power when the UPS requires maintenance. Three built-in communication ports (RS-232, contact closure and AS-400) work with included PowerAlert Software to simultaneously provide shutdown commands and reporting on multiple servers without the need for costly accessories. An accessory slot accepts an optional internal SNMP card (model # SNMPWEBCARD) for remote shutdowns, reboots and more. A Battery Start Switch allows cold restart of UPS during a prolonged blackout to utilize its batteries for periodic system access or data retrieval. An Emergency Power Off button turns UPS output OFF and disables Bypass output. Built-in Emergency Power Off (EPO) interface supports remote emergency shutdown in large facilities. Front panel combination LCD/LED display alerts users to a variety of UPS operational modes and conditions. A1-year limited repair warranty is included. A start-up service program is recommended to enhance the reliability of the installation.

Package Includes

- SU30K3/3XR5 UPS System (power and battery components in one module)
- PowerAlert Software and cabling

- Warranty information
- Instruction manual

Features

- Large internal battery compartment contains more internal batteries than the equivalent standard-run model (SU30K3/3) and more space to add additional optional internal battery packs to extend runtime.
- · Saves valuable space: power and battery components combined into a single small-footprint module
- Simplifies runtime scalability: convenient front panel battery access for expandable runtime with additional internal battery packs
- True on-line, double conversion UPS with IGBT technology provides pure, sine wave AC output at all times
- Maintains continuous operation through blackouts, voltage fluctuations and surges with zero transfer time
- Removes harmonic distortion, electrical impulses, frequency variations and other hard-to-solve power problems
- 30,000VA/24,000 watt power capacity with 3-phase, hardwire 120/208V AC input/output connections
- Features a wide input voltage correction range: 96 144/166 250V AC
- 61 minutes runtime at half load (11,300 watts) based on adding 3 SURBC2030 battery packs and 11 minutes runtime at full load (24,000 watts)
- 3:1 crest factor safely supports a variety of equipment, even those with wildly-fluctuating power demands
- Extend runtime by installing optional internal battery packs (model # SURBC2030) through the front panel access door. SU30K3/3XR5 includes 5 internal battery packs and accepts 3 additional internal battery packs. A standalone battery module compartment with a 4 battery pack capacity and daisy-chain capability (model # SUBF2030) is available to further extend runtime.
- 3 communication ports (RS-232, contact closure and AS-400)
- Slot for optional SNMP card (model # SNMPWEBCARD)
- Manual bypass switch as well as an automatic bypass function ensures 100% availability of connected equipment by safely passing through AC power when the UPS system requires maintenance
- Battery Start Switch allows cold restart of UPS during a prolonged blackout to utilize its batteries for periodic system access or data retrieval
- Emergency Power Off button turns UPS output OFF and disables Bypass output
- PowerAlert Universal UPS Power Management Software and 6 ft. communication cable included
- 1-year limited repair warranty
- Start-up service program is recommended to enhance the reliability of the installation
- Built-in Emergency Power Off (EPO) interface supports remote emergency shutdown in large facilities
- Combination LED/LCD display

Specifications

OUTPUT	
Output Volt Amp Capacity (VA)	30000
Output kVA capacity (kVA)	30
Output Watt Capacity (watts)	24000
Output kW capacity	24
Output power factor	0.8
Crest Factor	3:1
Nominal Output Voltage(s) Supported	120/208V; 3-Phase Wye
Frequency compatibility	50 / 60 Hz
Output voltage regulation (line mode)	+/- 2%

mode)	
Output AC waveform (battery mode)	Pure Sine wave
INPUT	
Rated input current (at maximum load)	90A (per phase, online)
Nominal Input Voltage(s) Supported	120V / 208V 3 phase wye
UPS input connection type	Hardwire
UPS input connection description	120/208V (3-Phase, 4 Wire, wye)
BATTERY	
Full load runtime (minutes)	11 min. (24kw)
Half load runtime (minutes)	25 min. (12kw)
Expandable battery runtime	Supports extended runtime with optional external battery packs
External battery pack compatibility	SURBC2030; SUBF2030 (holds 4 SURBC2030)
Expandable runtime description	Includes a battery housing with space for 3 internal SURBC2030 battery packs for extended runtime. Additional runtime capacity is available by adding SUBF2030 and additional SURBC2030 batteries - see runtime chart for specific recommendations
DC system voltage (VDC)	240
Battery recharge rate (included batteries)	2 - 4 hours from 10% to 90%
Replacement battery cartridge (internal UPS battery replacement)	SURBC2030
Battery Access	Front panel internal battery access door
Battery replacement description	Hot-swappable, replaceable batteries
VOLTAGE REGULATI	ION

ENVIRONMENTAL				
Operating Temperature Range	+32 to +104 degrees Fahrenheit / 0 to +40 degrees Celsius.			
Storage Temperature Range	+5 to +122 degrees Fahrenheit / -15 to +50 degrees Celsius.			
Relative Humidity	95%, non-condensing			
COMMUNICATIONS				
Communications interface	DB9 Serial; Contact closure; Slot for SNMP/Web interface			
Network monitoring port description	RS232, contact closure and AS400 monitoring ports are supported by 3 separate DB9 ports			
PowerAlert software	Included			
Communications cable	DB9 cabling included			
LINE / BATTERY TRA	NSFER			
Transfer time	No transfer time (0 ms.) in online, double-conversion mode			
Low voltage transfer to battery power (setpoint)	Maintains continuous operation during undervoltages as low as 96 / 166V AC (3-Phase, 4-Wire, wye). Below this point, output is maintained utilizing battery reserves.			
High voltage transfer to battery power (setpoint)	Maintains continuous operation during overvoltages as high as 144 / 250V AC (3-Phase, 4-Wire, wye). Above this point, output is maintained utilizing battery reserves.			
SPECIAL FEATURES				
Cold Start (startup in battery mode during a power failure)	Cold-start operation supported			
High availability UPS features	Automatic inverter bypass; Hot swappable batteries			
Green & high efficiency features	High efficiency economy mode operation; Schedulable daily hours of economy mode operation			

UPS Certifications	Tested to UL1778 (USA); Tested to CSA (Canada); Tested to NOM (Mexico); Meets FCC Part 15 Category A (EMI)
WARRANTY	
Product Warranty Period (U.S., Canada & Puerto Rico)	1-year limited warranty
