

## eSATA Cables

Click on image  
✓ to enlarge

The eSATA or external cables are designed to bring standard internal SATA drive performance out of the PC. Using a shielded cable with a maximum length of 2m, these high specification cables comfortably outperform both the more traditional USB and IEEE 1394 technologies.

### Features:

- New eSATA shielded cables designed for external, out of the box solutions
- Designed to connect external SATA drives to PCs fitted PCI SATA cards
- eSATA to SATA link cables also listed - eSATA male to SATA male eSATA male to SATA female assemblies
- Custom versions not available, listed lengths only

**3116-1**

Stock No	Description
