

Opto Isolator - RS232

- Complete electrical isolation
- Up to 9600 baud
- 10 kv breakdown isolators
- An in-line opto isolator for protecting equipment against spurious voltage surges
- Allows equipment to be interconnected where local ground potentials differ at either end of the connection
- Typical applications include connecting equipment in electrically noisy environments and blocking computer generated

noises from sensitive instruments

- Fitted at one end with a 9 way male 'D' connector and with a 9 way female 'D' connector at the other
- Supplied in a rugged machined plastic housing
- The device will run off the signal lines, however, power can be applied seperately if required (8 to 25 volts but the voltage must be higher than the peak signal voltage)
- See cables below for connection to device

221588

Type	Order Code	Price Each
Opto Isolator	133-9798 ●	
9 way male to 9 way female cable	133-9794	
9 way female to 25 way male cable	133-9797	
25 way female to 9 way male cable	133-9796
