Standards & Certifications

Flammability Standards:	UL94V-0 rated actuator, housing, & base The FR02 Series rotaries have not been tested for UL recognition or CSA certification. These switches are designed for use in a low-voltage, low-current circuit. When used as intended, the results do not produce hazardous energy.

Distinctive Characteristics

Slim .150" (3.8mm) body has the lowest profile in the industry and allows close stacking of PC boards.

Highly visible legends and choice of screwdriver or shaft actuators with arrow position indication provide trouble-free code setting.

Detent mechanism gives crisp, positive action for accurate switch setting.

Use of heat resistant resin allows infrared convection reflow soldering.

Gull-winged terminals ensure mechanical stability during soldering and simplify solder joint inspection.

Cam activated movable contact and gold contacts assure contact reliability and continuity.

Tape-reel packaging meets EIA-481-2 Standard.

Coplanarity: all considered surfaces must lie between two parallel planes that are a maximum distance apart of .0059" (0.15mm).

Reflow Soldering Recommended. See illustration and table.

Note: During Reflow Soldering process, set the switch to the following position: FR02FR10P, FR02FR16P, FR02KR10P, FR02KR16P: 0 position; FR02FC10P, FR02KC10P: 7 position; FR02FC16P, FR02KC16P: F position

Reflow Solder Profile	Symbol	Profile A High Temperature
Preheat Temperature	T1	180°C ~ 200°C
Preheat Time	t1	120 seconds
Heating Temperature	T2	230°C
Heating Time	t2	60 seconds
Peak Temperature (Surface)	T3	250°C
Peak Time	t3	Not Specified

Comments		PCB with no Lead

Note: The Reflow Solder profile above describes the printed circuit board (PCB) surface temperature. Since PCB surface temperature and switch surface temperature will vary depending on the height of switch, PCB material, and PCB thickness, ensure switch surface temperature does not exceed 250°C. Contact factory if your conditions are more severe than above specifications.

Cleaning:

These devices are not process sealed. Hand clean locally using alcohol based solution to remove flux on surface of PCB.

Handling:

When installing, avoid putting mechanical stress on terminal area.
