

C Series
High Q Capacitors

Type: C0603 [EIA CC0201]

Issue date: April 2011

TDK MLCC US Catalog

Version B11

REMINDERS

Please read before using this product

SAFETY REMINDERS

REMINDERS

- 1. If you intend to use a product listed in this catalog for a purpose that may cause loss of life or other damage, you must contact our company's sales window.
- 2. We may modify products or discontinue production of a product listed in this catalog without prior notification.
- 3. We provide "Delivery Specification" that explain precautions for the specifications and safety of each product listed in this catalog. We strongly recommend that you exchange these delivery specifications with customers that use one of these products.
- 4. If you plan to export a product listed in this catalog, keep in mind that it may be a restricted item according to the "Foreign Exchange and Foreign Trade Control Law". In such cases, it is necessary to acquire export permission in harmony with this law.
- 5. Any reproduction or transferring of the contents of this catalog is prohibited without prior permission from our company.
- 6. We are not responsible for problems that occur related to the intellectual property rights or other rights of our company or a third party when you use a product listed in this catalog. We do not grant license of these rights.
- 7. This catalog only applies to products purchased through our company or one of our company's official agencies. This catalog does not apply to products that are purchased through other third parties.

C Series High Q Capacitors

Type: C0603

Available Through Distribution Only*

Features

- Higher Q factor than standard capacitors
- High stability with respect to time, temperature, frequency, and voltage
- **Excellent attenuation**
- High self-resonant frequency
- Lower power dissipation/less energy absorption
- Capacitance range of 0.2pF to 15pF
- Available in standard and tight tolerance
- Please contact TDK for Q values

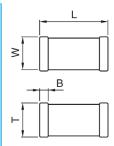

Applications

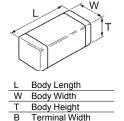

- · High-frequency applications
- PA modules
- · Cellular communication, Bluetooth
- Cable/satellite TV
- GPS/satellite radio
- Filter networks/matching networks
- · RF amplifiers/Low noise amplifiers
- · VCOs, TCXOs, etc.
- DC blocking circuits

Nominal Capacitance (pF)

The capacitance is expressed in three digit codes and in units of pico Farads (pF). The first and second digits identify the first and second significant figures of the capacitance. The third digit identifies the multiplier. R designates a decimal point.

Capacitance Code	Capacitance

Material: Glass Epoxy (As per JIS C6484 GE4)

P.C. Board thickness: Appendix - 2 0.8mm

Appendix - 1 1.6mm

Copper (thickness 0.035mm)

Solder resist

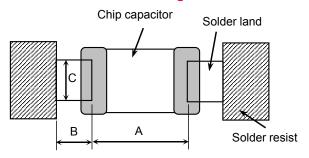

Case Code		Dimensions (mm)		
JIS	EIA	а	b	С
C0603	CC0201	0.3	0.8	0.3

^{*} This series is available through the distribution channel only. Please see www.tdk.com/distributor.php for a list of authorized distributors.

Recommended Soldering Land Pattern

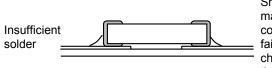

Reflow Soldering	g Unit: mm
Туре	C0603
Symbol	[CC0201]
Α	0.25 ~ 0.35
В	0.2 ~ 0.3
С	0.25 ~ 0.35

Recommended Solder Amount

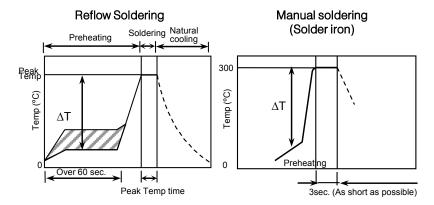

Higher tensile force on the chip capacitor may cause cracking.

Small solder fillet may cause contact failure or failure to hold the chip capacitor to the P.C. board.

• Recommended Soldering Profile

Recommended soldering duration

Temp./	Reflow Soldering		
Dura.	i eak teilip	Duration	
Solder	(°C)	(sec.)	
Sn-Pb Solder	230 max.	20 max.	
Lead-Free Solder	260 max.	10 max.	

Recommended solder compositions

Sn-37Pb (Sn-Pb solder)

Sn-3.0Ag-0.5Cu (Lead Free Solder)

Preheating Condition

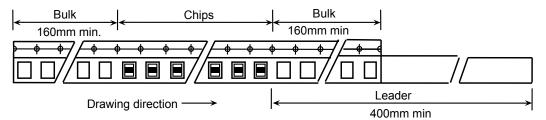

Soldering	Temp. (°C)
Reflow soldering	ΔT ≤ 150
Manual soldering	ΔT ≤ 150

^{*} This series is available through the distribution channel only. Please see www.tdk.com/distributor.php for a list of authorized distributors.

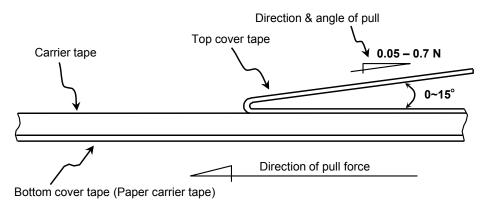

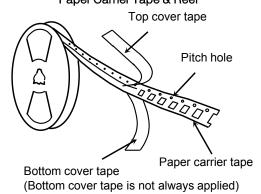

Carrier Tape Configuration

Peel Back Force (Top Tape)

- · Chip Quantity Per Reel and Structure of Reel
 - Paper Carrier Tape & Reel

Case Code		Chip		Chip quantity (pcs.)	
JIS	EIA	Thickness (mm)	Taping Material	φ178mm (7") reel	
C0603	CC0201	0.30	Paper	15,000	

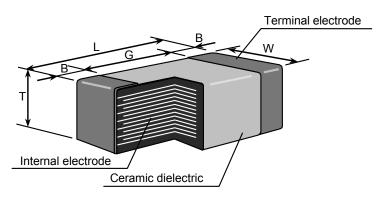

- Carrier tape shall be flexible enough to be wound around a minimum radius of 30mm with components in tape.
- \bullet The missing of components shall be less than 0.1%
- Components shall not stick to the cover tape.
- The cover tape shall not protrude beyond the edges of the carrier tape and shall not cover the sprocket holes.

^{*} This series is available through the distribution channel only. Please see www.tdk.com/distributor.php for a list of authorized distributors.

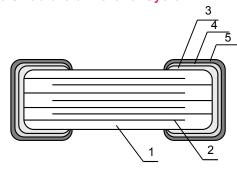

Shape & Dimensions

Case	e Code		Dir	nensions	(mm)	
JIS	EIA	L	W	Т	В	G
C0603	CC0201	0.60	0.30	0.30	0.15	0.20 min.

Inside Structure & Material System

No.	NAME	MATERIAL
		Class 1
(1)	Ceramic Dielectric	CaZrO ₃
(2)	Internal Electrode	Nickel (Ni)
(3)		Copper (Cu)
(4)	Termination	Nickel (Ni)
(5)		Tin (Sn)

Environmental Information

TDK Corporation established internal product environmental assurance standards that include the six hazardous substances banned by the EU RoHS Directive¹ enforced on July 1, 2006 along with additional substances independently banned by TDK and has successfully completed making general purpose electronic components conform to the RoHS Directive².

- 1. Abbreviation for Restriction on Hazardous Substances, which refers to the regulation EU Directive 2002/95/EC on hazardous substances by the European Union (EU) effective from July 1, 2006. The Directive bans the use of six specific hazardous substances in electric and electronic devices and products handled within the EU. The six substances are lead, mercury, cadmium, hexavalent chromium, PBB (polybrominated biphenyls), and PBDE (polybrominated diphenyl ethers).
- This means that, in conformity with the EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.
- For REACH (SVHC: 15 substances according to ECHA / October 2008): All TDK MLCC do not contain these 15 substances.
- For European Directive 2000/53/CE and 2005/673/CE : Cadmium, Hexavalent Chromium, Mercury, Lead are not contained in all TDK MLCC.
- For European Directive 2003/11/CE: Pentabromodiphenylether, Octabromodiphenylether are not contained in all TDK MLCC.
