

SPECIFICATION FOR APPROVAL

	SUNON				
DC	BRUSHLESS BLOWER				
Ν	MODEL: GB0535AEB1-8				
Ι	P/N : M				
CHARACTERISTICS					
1. Motor Design	: Patented single-coil DC brushless 8 poles motor				
	design.				
2. Insulation Resistance	: More than 500M ohm between internal stator and				
	lead wire(+) measured by DC 500V.				
3. Dielectric Strength	: Applied AC 500V for one minute or AC 600V for				
	2 seconds between housing and lead wire(+)				
4. Noise Level	: Measured in a semi-anechoic chamber				
	with background noise level below 15				
	dB(A). The fan is running in free air with				
	microphone at a distance of one meter				
	from the fan intake.				
5. Input power, Current & Speed	· : Measured after continuous 30 minutes				
	operation at rated voltage in clean air				
	at ambient temperature of 25 degrees C.				
6. Tolerances	: ±15% on rated power and current. 外銷卖				
7. Motor Protection	: Locked rotor protected. 文件轉發行章				
8. Air Performance	: Measured by a double chamber.				
	are recorded when the fan speed is stabilized				
	at rated voltage.

Notes

- 1. SUNON will not guarantee the products if the application of our products is exceeded the limitation which is specified on this specification.
- 2. In case of change of the specification specified on this document, a written notice is requested in advance.
- 3. Please do not touch the impeller with pressure and never bring the fan with lead wire. The bearings and lead wire may be damaged.
- 4. No guarantee on the products against the safety problem or failure caused by powder dust, drop of water or insect.
- 5. If there is any data or related documentation different from this data sheet, this data sheet is the principal reference.
- 6. For the purpose of MIS, please indicate SPEC No. on every order.
- 7. In case of the fan has no polarity protection function, wires with same color (electrode) must be connected together during the assembly. (i.e. red + red, black + black) or the fan will be damaged immediately.
- 8. Please do not use the fan in the environment of corrosive gas or liquid or any detrimental gas.
- 9. Please do not store the fan in the environment of high / low temperature, high humidity or any detrimental gas. Please store the fan within 6 months, every 6 months, there shall be a linkage of electric current to the fan, even though the fan is stored in room temperature.
- 10. While the fan is in operation, please do not lock the fan intentionally for a long period of time, since the continuous stoppage will result in over-heat and damage of the fan.
- 11.During the installation of the fan, please pay substantial attention to possible 的調節 cause by resonance vibration and vibration. 90, 4, 11
- 12. During the testing of the fan, please be sure to use finger guard to insure safety.
- 13. Unless otherwise specified, if there is any doubt in the judgement, the temperature relative humidity range of environment will be take in according to the standard test condition as 25°C and 65%.
