

# 3-teminal Filters(SMD)

For power line, T-type

### **ACH** series

Type: ACH32C [1206 inch]\*

ACH3218 [1207 inch] ACH4518 [1807 inch]

\* Dimensions Code JIS[EIA]

Issue date: December 2010

All specifications are subject to change without notice.

<sup>•</sup> Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

# 3-terminal Filters(SMD) For Power Line

#### **Conformity to RoHS Directive**

#### ACH Series ACH32C Type

#### **FEATURES**

- These T-type EMC filters comprise ferrite beads and chip capacitors and are engineered to handle high current levels.
- They provide highly effective EMC suppression.
- Because their structures are almost entirely ferrite, they exhibit excellent attenuation characteristics.
- Because guarantee temperature range is -40 to +125°C, it is possible to use in strict environmental condition.
- · Available for reflow soldering.

#### **APPLICATIONS**

Home electronic equipment, (TVs, VCRs, CD players, DAT players, electric musical instruments, PCs, etc.), office automation equipment (computers, terminals, stand-alone word processors, fax machines, etc.), factory automation equipment (robots, numerical control devices, process controllers, etc.), automotive electronics (car navigation, ECU, etc.)

#### SHAPES AND DIMENSIONS/CIRCUIT DIAGRAM

## RECOMMENDED PC BOARD PATTERN REFLOW SOLDERING

- Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.
- Please contact our Sales office when your application are considered the following:

  The device's failure or malfunction may directly endanger human life (e.g. application for automobile/aircraft/medical/nuclear power devices, etc.)

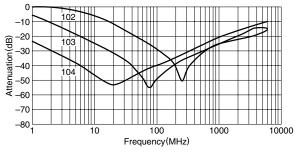

All specifications are subject to change without notice.

#### **CIRCUIT DIAGRAM**

<sup>•</sup> All specifications are subject to change without notice.

# 3-terminal Filters(SMD) For Power Line

#### **Conformity to RoHS Directive**

#### ACH Series ACH3218, 4518 Types

#### **FEATURES**

- The ACH series consists of products with superior attenuation characteristics, in which the T-type filter circuit is magnetically shielded with ferrite.
- The series offers even greater attenuation characteristics when used in a stable circuit on the ground.
- The ACH series is ideal for high-density circuit design, since the series is vertically mounted and does not require much mounting space.
- · Available for reflow soldering.
- · It is a product conforming to RoHS directive.

#### PRODUCT IDENTIFICATION

- (1) Series name
- (2) Dimensions
- (3) Type

#### **TEMPERATURE RANGES**

| Operating/Storage | −40 to +125°C |
|-------------------|---------------|
|                   |               |

#### PACKAGING STYLE AND QUANTITIES

| Packaging style | Quantity         |
|-----------------|------------------|
| Taping          | 1000 pieces/reel |
|                 |                  |

#### HANDLING AND PRECAUTIONS

- Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and product temperature does not exceed 150°C.
- After mounting components onto the printed circuit board, do not apply stress through board bending or mishandling.
- The inductance value may change due to magnetic saturation if the current exceeds the rated maximum.
- · Do not expose the inductors to stray magnetic fields.
- · Avoid static electricity discharge during handling.
- When hand soldering, apply the soldering iron to the printed circuit board only. Temperature of the iron tip should not exceed 350°C. Soldering time should not exceed 3 seconds.

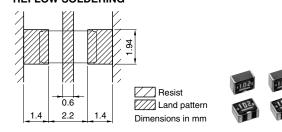

- Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.
- Please contact our Sales office when your application are considered the following:
   The device's failure or malfunction may directly endanger human life (e.g. application for automobile/aircraft/medical/nuclear power devices, etc.)
- All specifications are subject to change without notice.
