Control Switches and Signaling Devices, 22.5mm Metal Series

This range of 22.5mm metal series pushbuttons, selector switches, illuminated switches and pilot lights have been designed to provide the following features:

- Economy of space
- Self wiping contacts
- RoHS compliant
- Simple to mount (only need a screw driver)
- Mounting method is unaffected by excessive vibration
- Electric shock protection (grounded unit)
- Aesthetically pleasing
- Heavy-duty construction
- Shrouded terminals
- Very good flame resistance
- Use of LEDs for long life

Actuators

The circular actuators have chrome plated metal bezels and are functionally interchangeable on the different contact elements.

Contact elements

The contact elements are double break and have self-wiping contacts. The elements are interchangeable and can be stacked without additional hardware. 1 to 6 elements (NO or NC) can be used for non-illuminated actuators, whereas, 1 to 4 elements (NO or NC) can be used for illuminated actuators. Gold NO or NC contact elements for low voltage, low current, < 25mA, switching applications are available.

Illuminated pushbuttons and pilot lights

Pilot lights and pushbutton switches are suitable for direct connection through a series resistor, series resistor and diode, using bayonet cap filament bulb type BA9s as follows:

Supply voltage for direct connection without series resistor . . .	6V - 130V
Supply voltage through series resistor	12V - 415V
Supply voltage through resistor and diode	230 VAC
Bulb	Filament, type BA9S with OAL max. 28mm

Pilot lights and illuminated actuators are available with integral LEDs, suitable for operating at various voltages; 6V, 12V, 24V, 30V, 48V, 63.3V, 110V, 125V, 230VAC or DC and 415VAC. Pilot lights and illuminated actuators are available with LED bulbs (bayonet cap, BA9s design with OAL max. 28mm) suitable for operating at various voltages; 24V, 48V, 110V and 230V. On request an extra short circuit protection consisting of built-in fuse in the LED modules can be provided. Pilot lights are available with built -in transformers suitable for operating at 110VAC, 230VAC input and 6V, 12V and 24V output.

Terminals

Contact elements and pilot lights are designed to have shrouded terminals with combination screws.

Mounting

The metal series control devices 22.5mm can be mounted in any position on panels of 1 to 6 mm thickness. We recommend minimum mounting centers of 30mm x 40mm. However, the dimensions and configuration should be decided on the basis of the application. The actuators and the lens assemblies lock on the holding bracket. See assembly details.

Mounting details

Mounting bracket screws torque 8 - 10 in/lbs

Electrical and mechanical characteristics

Environment	
Standards conformity:	CSA - C22.2 No. 14-95, UL508, EN60947-5-1 2000
Approvals:	CSA - C22.2 No. 14-95, UL508, VDE0660
Degree of protection:	IP 65 as per IEC529, NEMA 4X, 12 as per UL50
Ambient temperature:	-25°C to +70°C
Operating position:	All positions

Contact element block

Element screw torque:	3 - 4 in/lbs
Connection screw torque:	5 - 7 in/lbs
Rated insulation voltage:	500V
Rated thermal current:	10A
Contact operation:	Self wiping, slow break NO or NC
Make and break capacity as per IEC 947-5-(1) 1990:	AC 15 - 4A, 415VAC DC 13 - 0.5A, 110VDC A 600 Q 600
as per CSA - C22.2 No. 14-95, UL508	

Terminal capacity:	Minimum 1 X 0.5mm ² (20AWG), maximum 2 x 15mm ² (2x16AWG), or 1 x 2.5mm ² (1x14AWG)
Terminals marking:	1-2 for NC, 3-4 for NO
Short circuit protection:	10A cartridge fuse, HRC type, rated for resistive loading
Mechanical life:	Over one million operations
Electrical rating:	(one million operating cycles at 3600 cycles per hour, load factor 0.5)

	V	24	120	230	V	24	110
AC15	A	4	3	2	DC13	A	0.5
							0.2

Modules for pilot lights and illuminated switches with integral LED / LED bulb (BA9S cap)

Current consumption (applicable to all colors)

24VAC/DC, 110VAC and 240VAC:	max. 20mA
110VDC:	max. 15mA
220VDC:	max. 10mA
Service life(at nominal voltage and at ambient temperature):	100,000 hours
Voltage limits (nominal voltage):	±20% of rated voltage
Short circuit protection:	on specific request
Terminal capacity:	min. 1 X 0.5mm ² (20AWG) max. 2 x 1.5mm ² (2x16AWG) or 1 x 2.5mm ² (1x14AWG)

Control Switches and Signaling Devices, 22.5mm Metal Series

Ordering Information

1. Actuators, illuminated actuators, contact elements, lens assemblies and pilot lights are each ordered separately. For complete assemblies, please contact the factory for specific part numbers
2. Prefix AS2 for all actuators indicates 22.5 metal series
3. The type numbers of contact elements are:

NO	Actuator mounting	S1, S3	Note: S3, S4, S7, and S8 have gold plated contact suitable for low voltage, low current applications <25mA
	Individual mounting	S5, S7	
NC	Actuator mounting	S2, S4	
	Individual mounting	S6, S8	
4. Part number examples:

Actuator	AS2AF3	= flush actuator, green, component only
Pilot light	AS2PLB4	= pilot light without series resistor, red

Accessories and spares

Legend plates

Legend plates 30 x 40 mm are supplied with the following standard text:

START UP OPEN AUTO SLOW RESET ON RIGHT FORWARD TRIP
STOP DOWN CLOSE HAND FAST INCH OFF LEFT REVERSE POWER ON

EMERGENCY STOP - legend plate is 60mm yellow with black text

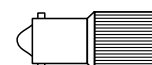

Replacement bulbs

Filament Bulb type ABA9S, OAL 28mm
