

Low voltage high bandwidth dual SPDT switch

Features

- Ultra low power dissipation:
 - $I_{CC} = 0.2 \mu A \text{ (Max.) at } T_A = 85 ^{\circ} C$
- Low "ON" resistance:
 - $R_{ON} = 4.6\Omega (T_A = 25^{\circ}C) \text{ at } V_{CC} = 4.3V$
 - $R_{ON} = 5.8\Omega (T_A = 25^{\circ}C) \text{ at } V_{CC} = 3.0V$
- Wide operating voltage range:
 - V_{CC} (Opr) = 1.65V to 4.3V single supply
- 4.3V tolerant and 1.8V compatible threshold on digital control input at V_{CC} = 2.3V to 3.0V
- Typical bandwidth (-3dB) at 800MHz on all channels
- Latch-up performance exceeds 100mA per JESD 78, Class II
- ESD performance exceeds JESD22
 - 2000-V Human body model (A114-A)
- USB (2.0) High speed (480Mbps) signal switching compliant

Description

The STG3682 is a high-speed CMOS low voltage dual analog S.P.D.T. (Single Pole Dual Throw) Switch or 2:1 Multiplexer /Demultiplexer Switch fabricated in silicon gate C²MOS technology. It is designed to operate from 1.65V to 4.3V, making this device ideal for portable applications.

The nSEL inputs are provided to control the switch. The switch S1 is ON (they are connected to common Ports Dn) when the nSEL input is held high and OFF (high impedance state exists between the two ports) when SEL is held low; the switch S2 is ON (it is connected to common Port D) when the nSEL input is held low and OFF (high impedance state exists between the two ports) when nSEL is held high.

Additional key features are fast switching speed, Break Before Make Delay Time and Ultra Low Power Consumption. All inputs and outputs are equipped with protection circuits against static discharge, giving them ESD immunity and transient excess voltage.

STG3682 Maximum rating

3 Maximum rating

Stressing the device above the rating listed in the "Absolute Maximum Ratings" table may cause permanent damage to the device. These are stress ratings only and operation of the device at these or any other conditions above those indicated in the Operating sections of this specification is not implied. Exposure to Absolute Maximum Rating conditions for extended periods may affect device reliability. Refer also to the STMicroelectronics SURE Program and other relevant quality documents.

Table 4. Absolute maximum ratings

Symbol	Parameter	Value	Unit
V _{CC}	Supply voltage	-0.5 to 5.5	V
V _I	DC input voltage	-0.5 to V _{CC} + 0.5	V
V _{IC}	DC control input voltage	-0.5 to 5.5	V

6 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
