

LH2111/LH2311 Dual Voltage Comparators

General Description

The LH2111 series of dual voltage comparators are two LM111 type comparators in a single hermetic package. Featuring all the same performance characteristics of the single, these duals offer in addition closer thermal tracking, lower weight, reduced insertion cost and smaller size than two singles. For additional information see the LM111 data sheet and National's Linear Application Handbook.

The LH2111 is specified for operation over the -55°C to $+125^{\circ}\text{C}$ military temperature range. The LH2311 is specified for operation over the 0°C to 70°C temperature range.

Note 1: This rating applies for $\pm 15V$ supplies. The positive input voltage limit is 30V above the negative supply. The negative input voltage limit is equal to the negative supply voltage or 30V below the positive supply, whichever is less.

Note 2: The maximum junction temperature is 150°C . For operating at elevated temperatures, devices in the flat package, the derating is based on a thermal resistance of $185^\circ\text{C}/\text{W}$ when mounted on a $1/16$ -inch-thick epoxy glass board with 0.03-inch-wide, 2 ounce copper conductor. The thermal resistance of the dual-in-line package is $100^\circ\text{C}/\text{W}$, junction to ambient.

Note 3: These specifications apply for $V_S = \pm 15V$ and $-55^\circ\text{C} \leq T_A \leq 125^\circ\text{C}$ for the LH2111, and $0^\circ\text{C} \leq T_A \leq 70^\circ\text{C}$ for the LH2311, unless otherwise stated. The offset voltage, offset current and bias current specifications apply for any supply voltage from a single 5V supply up to $\pm 15V$ supplies. For the LH2311, $V_{IN} = \pm 10\text{ mV}$.

Note 4: The offset voltages and offset currents given are the maximum values required to drive the output within a volt of either supply with a 1 mA load. Thus, these parameters define an error band and take into account the worst case effects of voltage gain and input impedance.

Note 5: The response time specified is for a 100 mV input step with 5 mV overdrive.

Note 6: RETS2111X for the LH2111D and LH2111F military specifications.
