PHILIPS

## 18-bit bus-interface D-type flip-flop

 with reset and enable (3-State)
## 74ABT16823A

## FEATURES

- Two sets of high speed parallel registers with positive edge-triggered D-type flip-flops
- Ideal where high speed, light loading, or increased fan-in are required with MOS microprocessors
- Live insertion/extraction permitted
- Power-up 3-State
- Power-up Reset
- Output capability: $+64 \mathrm{~mA} /-32 \mathrm{~mA}$
- Latch-up protection exceeds 500 mA per Jedec Std 17
- ESD protection exceeds 2000 V per MIL STD 883 Method 3015 and 200 V per Machine Model

## DESCRIPTION

The 74ABT16823A 18-bit bus interface register is designed to eliminate the extra packages required to buffer existing registers and provide extra data width for wider data/address paths of buses carrying parity.
The 74ABT16823A has two 9-bit wide buffered registers with Clock Enable ( nCE ) and Master Reset ( nMR ) which are ideal for parity bus interfacing in high microprogrammed systems.
The registers are fully edge-triggered. The state of each D input, one set-up time before the LOW-to-HIGH clock transition is transferred to the corresponding flip-flop's Q output.

## QUICK REFERENCE DATA

## ABSOLUTE MAXIMUM RATINGS ${ }^{1,2}$

| SYMBOL | PARAMETER | CONDITIONS | RATING | UNIT |
| :---: | :--- | :---: | :---: | :---: |
| $\mathrm{V}_{\mathrm{CC}}$ | DC supply voltage |  | -0.5 to +7.0 | V |
| $\mathrm{I}_{\mathrm{K}}$ | DC input diode current | $\mathrm{V}_{\mathrm{I}}<0 \mathrm{~V}$ | -18 | mA |
| $\mathrm{~V}_{\mathrm{I}}$ | DC input voltage ${ }^{3}$ |  | -1.2 to +7.0 | V |
| $\mathrm{I}_{\mathrm{OK}}$ | DC output diode current | $\mathrm{V}_{\mathrm{O}}<0 \mathrm{~V}$ | -50 | mA |
| $\mathrm{~V}_{\text {OUT }}$ | DC output voltage ${ }^{3}$ | output in Off or HIGH state | -0.5 to +5.5 | V |
| $\mathrm{I}_{\text {OUT }}$ | DC output current | output in LOW state | 128 | mA |
|  |  | output in HIGH state | -64 |  |
|  | Storage temperature range |  | -65 to 150 | ${ }^{\circ} \mathrm{C}$ |

NOTES:

1. Stresses beyond those listed may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
2. The performance capability of a high-performance integrated circuit in conjunction with its thermal environment can create junction temperatures which are detrimental to reliability. The maximum junction temperature of this integrated circuit should not exceed $150^{\circ} \mathrm{C}$.
3. The input and output voltage ratings may be exceeded if the input and output current ratings are observed.

RECOMMENDED OPERATING CONDITIONS

| SYMBOL | PARAMETER | LIMITS |  | UNIT |
| :---: | :--- | :---: | :---: | :---: |
|  |  | MIN | MAX |  |

## NOTES:

1. Not more than one output should be tested at a time, and the duration of the test should not exceed one second.
2. This is the increase in supply current for each input at 3.4 V .
3. For valid test results, data must not be loaded into the flip-flops (or latches) after applying the power.
4. This parameter is valid for any $\mathrm{V}_{\mathrm{Cc}}$ between 0 V and 2.1 V with a transition time of up to 10 msec . From $\mathrm{V}_{\mathrm{CC}}=2.1 \mathrm{~V}$ to $\mathrm{V}_{\mathrm{Cc}}=5 \mathrm{~V} \pm 10 \%$ a transition time of up to $100 \mu \mathrm{sec}$ is permitted.

## Data sheet status

| Level | Data sheet status [1] | Product <br> status ${ }^{\text {[2] [3] }}$ | Definitions |
| :--- | :--- | :--- | :--- |
| I | Objective data | Development | This data sheet contains data from the objective specification for product development. <br> Philips Semiconductors reserves the right to change the specification in any manner without notice. |
| II | Preliminary data | Qualification | This data sheet contains data from the preliminary specification. Supplementary data will be published <br> at a later date. Philips Semiconductors reserves the right to change the specification without notice, in <br> order to improve the design and supply the best possible product. |
| III | Product data | Production | This data sheet contains data from the product specification. Philips Semiconductors reserves the <br> right to make changes at any time in order to improve the design, manufacturing and supply. Relevant <br> changes will be communicated via a Customer Product/Process Change Notification (CPCN). |

## Definitions

Short-form specification - The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.
Limiting values definition — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.
Application information - Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

## Disclaimers

Life support - These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.
Right to make changes —Philips Semiconductors reserves the right to make changes in the products-including circuits, standard cells, and/or software-described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
