**USING ONLY THE MUTE FUNCTION**

To simplify the application, the stand-by pin can be connected directly to Ground. During the ON/OFF transitions it is recommended to respect the following conditions:

- At the turn-on the transition mute to mute - play must be made when the SVR pin is higher than 2.5V
- At the turn-off the TDA7496 must be brought to mute from the play condition when the SVR pin is higher than 2.5V.
