

MC100LVEL05

3.3V ECL 2-Input Differential AND/NAND

Description

The MC100LVEL05 is a 2-input differential AND/NAND gate. The device is functionally equivalent to the MC100EL05 device and operates from a 3.3 V supply voltage. With propagation delays and output transition times equivalent to the EL05, the LVEL05 is ideally suited for those applications which require the ultimate in AC performance at low voltage power supplies.

Because a negative 2-input NAND is equivalent to a 2-input OR function, the differential inputs and outputs of the device allows the LVEL05 to also be used as a 2-input differential OR/NOR gate.

Device specification limit values are applied individually under normal operating conditions and not valid simultaneously.

1. Input and output parameters vary 1:1 with V_{CC} . V_{EE} can vary $\pm 0.3\text{ V}$.
2. Outputs are terminated through a 50 ohm resistor to $V_{CC} - 2.0\text{ V}$.
