

**Technical Data Sheet****Infrared Remote-control Receiver Module****IRM-H6XXT/TR2****Features**

- High shielding against electric field disturbance.
- Circular lens to improve the receive characteristic.
- Line-up for various center carrier frequencies.
- Low voltage and low power consumption.
- High immunity against ambient light.
- Photodiode with integrated circuit.
- TTL and CMOS compatibility.
- Top-received SMD.
- Suitable burst length  $\geq 10$  pulses/burst.
- This product itself will remain within RoHS compliant version.
- Pb free.
- External dimensions 5(L)\*7(W)\*4(H)mm.

**Descriptions**

The device is a miniature SMD type infrared remote control system receiver that has been developed and designed by utilizing the most updated IC technology. The PIN diode and preamplifier are assembled on lead frame, the epoxy package is designed as an IR filter. The demodulated output signal can directly be decoded by a microprocessor.

**Applications**

1. Light detecting portion of remote control
  - AV instruments such as Audio, TV, VCR, CD, MD, etc.
  - Home appliances such as Air-conditioner, Fan , etc.
  - The other equipments with wireless remote control.
  - CATV set top boxes
  - Multi-media Equipment

**Device Selection Guide**

| PART    | MATERIAL | COLOR |
|---------|----------|-------|
| Chip    | Silicon  | ---   |
| Package | Epoxy    | Black |

**IRM-H6XXT/TR2**

**Package Dimensions**

- Notes :** 1.All dimensions are in millimeters.  
 2.Tolerances unless dimensions  $\pm 0.2\text{mm}$ .

**Soldering patterns**

The following soldering patterns are recommended for reflow-soldering :

Unit: mm

**Available Types For Different Carrier Frequencies**

| Type          | Carrier Frequencies (Typ) |
|---------------|---------------------------|
| IRM-H638T/TR2 | 38 kHz                    |

---

**IRM-H6XXT/TR2**
**Absolute Maximum Ratings (Ta=25°C)**

| Parameter             | Symbol | Rating    | Unit | Notice |
|-----------------------|--------|-----------|------|--------|
| Supply Voltage        | Vcc    | 0~6       | V    |        |
| Operating Temperature | Topr   | -25 ~ +85 | °C   |        |
| Storage Temperature   | Tstg   | -40 ~ +85 | °C   |        |

**Recommended Operating Condition**
**Supply Voltage Rating: Vcc 2.7V to 5.5V**
**Electro-Optical Characteristics (Ta=25°C, and Vcc=3.0V)**

| Parameter                 | Symbol          | MIN. | TYP. | MAX. | Unit    | Condition             |
|---------------------------|-----------------|------|------|------|---------|-----------------------|
| Supply Current            | Icc             | ---  | ---  | 1.2  | mA      | No signal input       |
| Peak Wavelength           | $\lambda_p$     | ---  | 940  | ---  | nm      |                       |
| Reception Distance        | L <sub>0</sub>  | 8    | ---  | ---  | m       | At the ray axis<br>*1 |
|                           | L <sub>45</sub> | 5    | ---  | ---  |         |                       |
| Half Angle(Horizontal)    | $\Theta_h$      | ---  | 45   | ---  | deg     |                       |
| Half Angle(Vertical)      | $\Theta_v$      | ---  | 45   | ---  | deg     |                       |
| High Level Pulse Width    | T <sub>H</sub>  | 400  | ---  | 800  | $\mu s$ | At the ray axis<br>*2 |
| Low Level Pulse Width     | T <sub>L</sub>  | 400  | ---  | 800  | $\mu s$ |                       |
| High Level Output Voltage | V <sub>H</sub>  | 2.7  | ---  | ---  | V       |                       |
| Low Level Output Voltage  | V <sub>L</sub>  | ---  | 0.2  | 0.5  | V       |                       |

**Notes:**

\*1 : The ray receiving surface at a vertex and relation to the ray axis in the range of  $\theta=0^\circ$  and  $\theta=45^\circ$ .

\*2 : A range from 30cm to the arrival distance. Average value of 50 pulses.

**The Notice of Application:**

Transmission remote control signal consist of four parts: Encode Part, IR Transmitter Source, IRM device, Decode Part

1. When IRM-H6XXT code select frequency, it need to well understand the center system of encode part.
2. Strong or weak light of IR Transmitter can affect distance of transmission.
3. Minimum Burst Length  $T_{burst}$  (number of pulses per burst) : 10 cycles
4. It needs to ensure the translation range of decode part if it is applied to the pulse-width range.

If the above items hardly assure of its application, it'll cause NG(no good) message from the edge of signal.

Note: This model might not work well with RCA code.

**Test Method :**

The specified electro-optical characteristics is satisfied under the following Conditions at the controllable distance.

①Measurement place

A place that is nothing of extreme light reflected in the room.

②External light

Project the light of ordinary white fluorescent lamps which are not high Frequency lamps and must be less then 10 Lux at the module surface.  
( $E_e \leq 10\text{Lux}$ )

③Standard transmitter

A transmitter whose output is so adjusted as to  $V_o=400\text{mVp-p}$  and the output Wave form shown in Fig.-1.According to the measurement method shown in Fig.-2 the standard transmitter is specified.

However , the infrared photodiode to be used for the transmitter should be  $\lambda_p=940\text{nm}, \Delta\lambda=50\text{nm}$ . Also, photodiode is used of PD438B( $V_r=5\text{V}$ ).  
(Standard light / Light source temperature  $2856^\circ\text{K}$ ).

④Measuring system

According to the measuring system shown in Fig.-3

Fig.-1 Transmitter Wave Form

D.U.T output Pulse

**Reliability Test Item And Condition**

The reliability of products shall be satisfied with items listed below.

Confidence level : 90%

LTPD : 10%

Reflow Terms: JEDEC Level 4 Specification

Drying; Temp.:125°C 24hrs → Moisture 30°C / 60% RH 96hrs → Reflow Temp.: 260°C±5°C  
10sec, 3 times

Note:

1. Not sooner than 15 minutes and not longer than 4 hours after removal from the temperature/humidity chamber.
2. The time between reflow shall be 5 minutes minimum and 60 minutes maximum.

**Recommended method of storage**

Dry box storage is recommended as soon as the aluminum bag has been opened prevent moisture absorption. The following conditions should be observed, if dry boxes are not available:

- Storage temperature 10°C to 30°C
- Storage humidity  $\leq 60\%RH$  max.

After more than 72 hours under these conditions moisture content will be too high for Reflow soldering:

In case of moisture absorption, the devices will recover to former condition by drying under the following condition:

192 hours at 40°C+5°C/-0°C and 5%RH (dry air / nitrogen) or  
96 hours at 60°C+5°C and < 5%RH for all device containers or  
24 hours at 125°C+5°C not suitable for reel or tubes.

**ESD Precaution**

Proper storage and handing procedures should be followed to prevent ESD damage to the devices especially when they are removed from the Anti-static bag. Electro-Static Sensitive Devices warning labels are on the packing.

**Recommended Solder Profile**

**Notice:**

- (1) Reflow soldering should not be done more than two times.
- (2) When soldering, do not put stress on the IRM-H6XXT/TR2 Series devices during heating.
- (3) After soldering, do not warp the circuit board.

**Soldering Iron**

Each terminal is to go to the tip of soldering iron temperature less than 350°C for 3 seconds within once in less than the soldering iron capacity 25W. Leave two seconds and more intervals, and do soldering of each terminal. Be careful because the damage of the product is often started at the time of the hand solder.

**Repairing**

Repair should not be done after the Devices have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of the Devices will or will not be damaged by repairing.

**Packing Quantity Specification**

1. 1000 PCS/1 Reel
2. 5 Reel /1Carton

**Carrier Tape Dimensions: Loaded quantity 1000 PCS per reel**

**Packing process**

## Label Form Specification

CPN: Customer's Production Number  
P/N : Production Number  
QTY: Packing Quantity  
CAT: None  
HUE: None  
REF: Reference  
LOT No: Lot Number  
MADE IN CHINA: Production Place

## Notes

1. Above specification may be changed without notice. EVERLIGHT will reserve authority on material change for above specification.
2. When using this product, please observe the absolute maximum ratings and the instructions for using outlined in these specification sheets. EVERLIGHT assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets.
3. These specification sheets include materials protected under copyright of EVERLIGHT corporation. Please don't reproduce or cause anyone to reproduce them without EVERLIGHT's consent.
