

TOSHIBA BIPOLAR LINEAR INTEGRATED CIRCUIT SILICON MONOLITHIC

TA8189N

QUAD PREAMPLIFIER FOR DOUBLE CASSETTE TAPE RECORDER

The TA8189N is a Quad pre amplifier designed for use in record / play back amplifier. It is suitable for double cassette tape recorder.

FEATURES

- Play back Amp
 - Built in input select switch.
 - Built in equalizer control switch.
 - Mixing output, for music selection.
- Recording Amp
 - Built in ALC detector circuit.
- Operating supply voltage range : $V_{CC(opr)} = 4.0 \sim 13.5V$ ($T_a = 25^\circ C$)

- TOSHIBA is continually working to improve the quality and the reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to observe standards of safety, and to avoid situations in which a malfunction or failure of a TOSHIBA product could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent products specifications. Also, please keep in mind the precautions and conditions set forth in the TOSHIBA Semiconductor Reliability Handbook.

APPLICATION INFORMATION AND APPLICATION METHOD

1. Input level of play amp.

In case that input voltage ($V_{in} > 0.0245V_{rms}$ (-30dBm)) is applied to A-Head and B-Head at same time on a set, use A-Head for reproducing only and, B-Head for recording or reproducing.

In case that the over-voltage is applied to A-Head and B-Head at same time, the Transistor Q_3, Q_4 are made a saturation condition and NF condenser is discharged by Base-current of Q_3, Q_4 and the output DC voltage of pin 3 / 22 are raised.

In case of the high input, use B-Head, because of building in the diode against saturation on Q_4 .

2. Power source line

In case of including the Ripple on the power source line, stabilize by using a transistor as following figure.
