### **GENERAL DESCRIPTION**

The Analog Devices AD741 Series are high performance monolithic operational amplifiers. All the devices feature full short circuit protection and internal compensation.

The Analog Devices AD741J, AD741K, AD741L, and AD741S are specially tested and selected versions of the standard AD741 operational amplifier. Improved processing and additional electrical testing guarantee the user precision performance at a very low cost. The AD741J, K and L substantially increase overall accuracy over the standard AD741C by providing maximum limits on offset voltage drift and significantly reducing the errors due to offset voltage, bias current, offset current, voltage gain, power supply rejection and common-mode rejection. For example, the AD741L features maximum offset voltage drift of  $5 \,\mu V/^{\circ}C$ , offset voltage of 0.5 mV max, offset current of 5 nA max, bias current of 50 nA max and a CMRR of 90 dB min. The AD741S offers guaranteed performance over the extended temperature range of -55°C to +125°C, with max offset voltage drift of 15 µV/°C, max offset voltage of 4 mV, max offset current of 25 nA, and a minimum CMRR of 80 dB.

### HIGH OUTPUT CAPABILITY

Both the AD741J and AD741S offer the user the additional advantages of high guaranteed output current and gain at low values of load impedance. The AD741J guarantees a minimum gain of 25,000 swinging ±10 V into a 1 k $\Omega$  load from 0°C to +70°C. The AD741S guarantees a minimum gain of 25,000 swinging ±10 V into a 1 k $\Omega$  load from -55°C to +125°C.

All devices feature full short circuit protection, high gain, high common-mode range and internal compensation. The AD741J, K and L are specified for operation from 0 to  $+70^{\circ}$ C and are available in both the TO-99 and mini-DIP packages. The AD741S is specified for operation from  $-55^{\circ}$ C to  $+125^{\circ}$ C, and is available in the TO-99 package.

NOTES

 $^{1}$ For supply voltages less than  $\pm 15$  V, the absolute maximum input voltage is equal to the supply voltage.

All min and max specifications are guaranteed. Specifications shown in **boldface** are tested on all production units at final electrical test. Results from those tests are used to calculate outgoing quality levels.

Specifications subject to change without notice.

## **AD741 Series**

### ABSOLUTE MAXIMUM RATINGS

| Absolute Maximum Ratings      | AD741, J,<br>K, L, S    | AD741C     |
|-------------------------------|-------------------------|------------|
| Supply Voltage                | ±22 V                   | ±18 V      |
| Internal Power Dissipation    | $500 \text{ mW}^1$      | 500 mW     |
| Differential Input Voltage    | ±30 V                   | ±30 V      |
| Input Voltage                 | ±15 V                   | ±15 V      |
| Storage Temperature Range     | -65°C                   | -65°C      |
|                               | to +150°C               | to +150°C  |
| Lead Temperature              |                         |            |
| (Soldering, 60 sec)           | +300°C                  | +300°C     |
| Output Short Circuit Duration | Indefinite <sup>2</sup> | Indefinite |

### NOTES

<sup>1</sup>Rating applies for case temperature to +125 °C. Derate TO-99 linearity at 6.5 mW/°C for ambient temperatures above +70 °C.

 $^{2}$ Rating applies for shorts to ground or either supply at case temperatures to +125°C or ambient temperatures to +75°C.

### **ORDERING GUIDE**

| Model <sup>1</sup> | Temperature<br>Range | Initial Off<br>Set Voltage | Package<br>Description | Package<br>Option |
|--------------------|----------------------|----------------------------|------------------------|-------------------|
| AD741CN            | 0°C to +70°C         | 6.0 mV                     | Mini-DIP               | (N-8)             |
| AD741CH            | 0°C to +70°C         | 6.0 mV                     | TO-99                  | (H-08A)           |
| AD741JN            | 0°C to +70°C         | 3.0 mV                     | Mini-DIP               | (N-8)             |
| AD741JH            | 0°C to +70°C         | 3.0 mV                     | TO-99                  | (H-08A)           |
| AD741KN            | 0°C to +70°C         | 2.0 mV                     | Mini-DIP               | (N-8)             |
| AD741KH            | 0°C to +70°C         | 2.0 mV                     | TO-99                  | (H-08A)           |
| AD741LN            | 0°C to +70°C         | 0.5 mV                     | Mini-DIP               | (N-8)             |
| AD741LH            | 0°C to +70°C         | 0.5 mV                     | TO-99                  | (H-08A)           |
| AD741H             | –55°C to +125°C      | 5.0 mV                     | TO-99                  | (H-08A)           |
| AD741SH            | –55°C to +125°C      | 2.0 mV                     | TO-99                  | (H-08A)           |

### **METALIZATION PHOTOGRAPH**

All versions of the AD741 are available in chip form. Contact factory for latest dimensions. Dimensions shown in inches and (mm).

PAD NUMBERS CORRESPOND TO PIN NUMBERS FOR THE TO-99 8-PIN METAL PACKAGE.

#### NOTE

<sup>1</sup>J, K and S grade chips also available.

### OUTLINE DIMENSIONS

Dimensions shown in inches and (mm).
