

**FEATURES**

- 240ps propagation delay
- High bandwidth output transitions
- Internal 75K $\Omega$  input pull-down resistors
- Available in 8-pin SOIC package

**DESCRIPTION**

The SY10/100EL04 are 2-input AND/NAND gates. These devices are functionally equivalent to the E104 devices, with higher performance capabilities. With propagation delays and output transition times significantly faster than the E104, the EL04 is ideally suited for those applications which require the ultimate in AC performance.
