| Low Voltage 8-Input Multiplexer |  |  |  |  |
| General Description Features |  |  |  |  |
| The LVQ151 is a high-speed 8 -input digital multiplexer. It provides, in one package, the ability to select one line of data from up to eight sources. The LVQ151 can be used as a universal function generator to generate any logic function of four variables. Both true and complementary outputs are provided. |  |  | for low power ranteed simul mic threshold ranteed pin-toranteed inciden | w noise 3.3V applications <br> eous switching noise level and rformance <br> skew AC performance <br> wave switching into $75 \Omega$ |
