

NMF3506

Advance Information

RF Filtering and ESD Protection on I²C Bus and Digital Line, Thermal Shutdown and Power Switch with Short Circuit Protection

The NMF3506 interfaces with mobile phone accessories using I²C bus. It includes two I²C line filters and a general purpose digital line filter. It is compliant with EMC international standards required for cellular phones and portable equipment. It also includes a low voltage drop power switch to control the accessory supply. It has safety features such as thermal shutdown and main switch short circuit protection. All I/O are ESD protected according to the stringent IEC 61000-4-2 international standard.

Features

- ESD Protection IEC 61000-4-2 Level 4 (V_{batt} and Output Pins)
- ESD Protection IEC 61000-4-2 Level 1 (All I/O)
- RF Filtering (800 MHz-6.0 GHz): -25 dB
- RF Filtering (1.0 GHz-2.5 GHz): -30 dB
- Power Switch: 120 mA (<200 mV)
- Voltage Drop Across Power Switch: <200 mV
- Controlled I²C Bias
- Low Quiescent Current, 10 μ A_{off}, 100 μ A_{on}
- 15 Bump Flip-Chip Direct Chip Attach:
2.1 mm x 2.1 mm x 0.65 mm
- This is a Pb-Free Device

Typical Application

- Cellular Phones
- Portable Equipment

MAXIMUM RATINGS

Rating	Symbol	Max	Unit
Junction Temperature	T _J	150	°C
Operating Temperature Range	T _{OP}	–40 to +85	°C
Storage Temperature Range	T _{stg}	–55 to +150	°C

Maximum ratings are those values beyond which device damage can occur. Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and are not valid simultaneously. If these limits are exceeded, device functional operation is not implied, damage may occur and reliability may be affected.
