

Mute detector IC

BA3703F

The BA3703F is a mute detector designed for car stereos. It features low external parts count, and can detect mute whether the tape is playing or being fast-forwarded. It features a wide power supply voltage range (6.0V to 16.0V) and is ideal for use in car stereos and other audio equipment.

●Application
Car stereos

- Features
- 1) Can detect mute during playback and fast-forward.

2) The signal detect and mute detect times can be set using attached components.

3) Wide operating voltage range (6.0V to 16.0V).

●Block diagram

●Absolute maximum ratings (Ta = 25°C)

Parameter	Symbol	Limits	Unit
Power supply voltage	Vcc	18	V
Power dissipation	Pd	550*	mW
Operating temperature	Topr	−30~+85	°C
Storage temperature	Tstg	−55~+125	°C

* When mounted on a 70mm×70mm×1.6mm glass epoxy board.
Reduced by 5.5mW for each increase in Ta of 1°C over 25°C.
