869 MHz to 1990 MHz Quadrature Modulators

## FEATURES

Operating frequencies
ADL5590: 869 MHz to 960 MHz
ADL5591: 1805 MHz to 1990 MHz
Output compression point P1dB: 16 dBm
Output third-order intercept point OIP3
ADL5590: 29 dBm @ 900 MHz
ADL5591: $\mathbf{3 0}$ dBm @ 1900 MHz
Noise floor: $\mathbf{- 1 5 7} \mathbf{~ d B m} / \mathbf{H z}$
Sideband suppression
ADL5590: <-50 dBc @ 900 MHz
ADL5591: <-47 dBc @ 1900 MHz
Baseband common-mode bias: 1.5 V
LO leakage
ADL5590: - $\mathbf{5 0} \mathbf{~ d B c @ 9 0 0 ~ M H z , ~ P o u t ~}=5 \mathrm{dBm}$
ADL5591: - $\mathbf{4 4} \mathbf{~ d B c} @ 1900 \mathrm{MHz}$, Pout $=5 \mathrm{dBm}$
Single supply: 4.75 V to 5.25 V
Package: 36-lead, $6 \mathrm{~mm} \times 6 \mathrm{~mm}$ LFCSP

## APPLICATIONS

## Wireless infrastructure

## Optimized for GSM transmitters

## GENERAL DESCRIPTION

This family of monolithic RF quadrature modulators is designed for use from 869 MHz to 960 MHz and from 1805 MHz to 1990 MHz . Excellent phase accuracy and amplitude balance enable high performance, direct RF modulation for communications systems.

The ADL5590 and ADL5591 can be used as direct RF modulators in digital communications systems such as those using the Global System for Mobile Communications (GSM) network. In addition, the parts are compatible with enhanced data rates for GSM evolution (EDGE).

This family is fabricated using an advanced silicon-germanium bipolar process from Analog Devices, Inc., and is available in a 36-lead, exposed paddle LFCSP. The devices operate from $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.

## ADL5590/ADL5591

## ABSOLUTE MAXIMUM RATINGS

Table 2.

| Parameter | Rating |
| :--- | :--- |
| Supply Voltage, VPS1 to VPS5 | 5.5 V |
| IBBP, IBBN, QBBP, QBBN | $0 \mathrm{~V}, 3 \mathrm{~V}$ |
| LOIP | 10 dBm |
| Internal Power Dissipation | 1155 mW |
| $\theta_{\mathrm{JA}}$ (Exposed Paddle Soldered Down) | $40^{\circ} \mathrm{C} / \mathrm{W}$ |
| Maximum Junction Temperature | $132^{\circ} \mathrm{C}$ |
| Operating Temperature Range | $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| Storage Temperature Range | $-65^{\circ} \mathrm{C}$ to $+150^{\circ} \mathrm{C}$ |
| Maximum Soldering Temperature | $260^{\circ} \mathrm{C}$ |

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## ESD CAUTION

|  | ESD (electrostatic discharge) sensitive device. <br> Charged devices and circuit boards can discharge <br> without detection. Although this product features <br> patented or proprietary protection circuitry, damage <br> may occur on devices subjected to high energy ESD. <br> Therefore, proper ESD precautions should be taken to <br> avoid performance degradation or loss of functionality. |

## ADL5590/ADL5591

## PIN CONFIGURATION AND FUNCTION DESCRIPTIONS

Figure 2. ADL5590/ADL5591 Pin Configuration

Table 3. Pin Function Descriptions

| Pin No. | Mnemonic | Description |
| :---: | :---: | :---: |
| $1,2,5,7$ to 12,14 , 16 to 19, 22, 24, 27 to $30,32,34$ to 36 | GND | Ground. Connect to ground plane via a low impedance path. |
| 3, 13, 15, 31, 33 | VPS1, VPS2, VPS3, VPS4, VPS5 | Positive Supply Voltage. All pins should be connected to the same supply. To ensure adequate external bypassing, connect $0.1 \mu \mathrm{~F}$ capacitors between each pin and ground. |
| 4,6 | LOIP, LOIN | Local Oscillator Input. $50 \Omega$ single-ended local oscillator input. Pins must be ac-coupled. AC-couple LOIN to ground and drive LO through LOIP. |
| 20, 21, 25, 26 | IBBP, IBBN, QBBN, QBBP | Baseband Inputs. Differential in-phase and quadrature baseband inputs. These high impedance inputs must be dc-biased to approximately 1.5 V dc. These inputs are not self-biased and must be externally biased. |
| 23 | VOUT | RF Output. Single-ended, $50 \Omega$, internally biased RF output. Pin must be ac-coupled to the load. |
| - | Exposed Paddle | Exposed Paddle. Connect to ground plane via a low impedance path. |
