

## Horizontal Deflection Transistor Series for TV

### ■ Overview

Based on accumulated manufacturing technology, these horizontal deflection transistors for TVs offer high performance and compact design. They can also withstand high voltage and maintain low loss. They also have a broad area of safe-operation, despite an absolutely minimal chip area which allows very compact package configuration. These advanced features contribute to higher performing, more reliable home-use TVs that cost less.

### ■ Features

- Withstands ultrahigh voltage : 1500V/1600V/1700V/1800V/2000V
- Low loss: V<sub>CE(sat)</sub><3V
- Broad area of safe-operation.
