NTE16007 Silicon NPN Transistor General Purpose for Medium Power Applications

Description:

The NTE16007 is a silicon NPN diffused-junction power transistor in a TO8 type package intended for a wide variety of applications in industrial and military equipment. This device is particularly useful in power-switching circuits such as in DC-to-DC converters, inverters, choppers, solenoid and relay controls; and as class A and class B push-pull audio and servo amplifiers.
