Functional Description

Change ID procedure

- First press Receiver **RESET** key, the LED will blink very quickly.
- Now press Transmitter L, M, R button at least 3-minutes, the mouse will jump to change ID mode and output a change ID signal to the receiver.
- At the same time, the LED of the Receiver will blink slowly to wait the change ID information.
- The user can decide which ID to be changed by pressing M button. If the user wants to change ID to 4, just press the M button four time (This mouse support 8 ID).
- After deciding the ID number, the user can easy return to normal mode by pressing the L or R button once.
- After the Receiver receive the END signal of the change ID, the LED will no longer blink and the Receiver returns to normal mode.
