

**LB11817****Three-Phase Full-Wave Linear Drive****Preliminary****Overview**

The LB11817 is a spindle motor driver for use in slim-shaped FDDs that use 5 V power supply.

Functions and Features

- Three-phase full-wave linear drive
- Low saturation voltage
- Built-in digital speed control
- Start/stop circuit (active low)
- Speed switching
- Current limiter
- Index processing circuit
- The index timing can be adjustment with a variable resistor.
- Thermal protection circuit

Package Dimensions

unit: mm

3247-SSOP36**Specifications****Absolute Maximum Ratings at Ta = 25°C**

Parameter	Symbol	Conditions	Ratings	Unit
Maximum supply voltage	V_{CCmax}		7.0	V
Maximum output current	I_{Omax1}	$t \leq 0.5$ s	1.5	A
Maximum steady-state output current	I_{Omax2}		1.0	A
Allowable power dissipation 1	P_{dmax1}	Independent IC	0.6	W
Operating temperature	T_{opr}		-20 to +80	°C
Storage temperature	T_{stg}		-40 to +150	°C

Allowable Operating Ranges at Ta = 25°C

Parameter	Symbol	Conditions	Ratings	Unit
Supply voltage	V_{CC}		4.2 to 6.5	V

- Any and all SANYO products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your SANYO representative nearest you before using any SANYO products described or contained herein in such applications.
- SANYO assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO products described or contained herein.

- Specifications of any and all SANYO products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- SANYO Electric Co., Ltd. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any or all SANYO products (including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.
