

LB1822

3-Phase Brushless Motor Predriver with Digital Speed Control

Overview

The LB1822 is a monolithic predriver IC for controlling three-phase brushless motors and has an on-chip digital speed control circuit. The LB1822 is ideally suited for driving the motor of laser beam printers, facsimiles, plain paper copiers, and so on.

Features

- 30V withstand voltage and 30mA output current.
- Current limiter.
- Low-voltage protection circuit.
- Thermal shutdown circuit.
- Hall amp with hysteresis characteristic.
- Start/Stop terminals.
- Crystal oscillator and divider.
- Digital speed control circuit.
- Lock detector.

Package Dimensions

unit:mm

3147A-DIP28HS

Specifications

Absolute Maximum Ratings at $T_a = 25^\circ\text{C}$

Parameter	Symbol	Conditions	Ratings	Unit
Maximum supply voltage 1	V_{CC}		30	V
Maximum supply voltage 2	V_M		30	V
Output current	I_O		30	mA
Allowable power dissipation1	$P_d \text{ max1}$	Independent IC	3	W
Allowable power dissipation2	$P_d \text{ max2}$	With infinite heat sink	20	W
Operating temperature	T_{opr}		-20 to +80	$^\circ\text{C}$
Storage temperature	T_{stg}		-55 to +150	$^\circ\text{C}$

Allowable Operating Conditions at $T_a = 25^\circ\text{C}$

Parameter	Symbol	Conditions	Ratings	Unit
Supply voltage1	V_{CC}		9.5 to 28	V
Supply voltage2	V_M		5 to 28	V
Voltage regulator output current	I_{VH}		0 to 20	mA
Comparator output current	I_{OSC}		0 to 30	mA
Lock detector output current	I_{LD}		0 to 20	mA

■ Any and all SANYO products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your SANYO representative nearest you before using any SANYO products described or contained herein in such applications.

■ SANYO assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO products described or contained herein.

Electrical Characteristics at Ta = 25°C, VCC=VM=24V

Parameter	Symbol	Conditions	Ratings			Unit
			min	typ	max	
Supply current 1	I _{CC1}			33	50	mA
Supply current 2	I _{CC2}	Stop mode		3	5	mA
Output saturation voltage	V _{O sat1}	I _O =10mA		1.5	2.0	V
Output leak current	I _{O leak}				100	μA
[Voltage regulator]						
Output voltage	V _H	I _{VH} =10mA	3.8	4.15	4.5	V
Voltage fluctuation	ΔV _{H1}	V _{CC} =9.5 to 28V		60	150	mV
Load fluctuation	ΔV _{H2}	I _{VH} =5 to 20V		60	150	mV
Temperature Coefficient				-2		mV/°C
[Hall amplifier]						
Input bias current	I _{HB}			1	4	μA
Common-mode input voltage	V _{ICH}		1.5		2.8	V
Hall input sensitivity			100			mVp-p
Hysteresis width	ΔV _{IN}		24	33	42	mV
Low to high input voltage	V _{SLH}		8	20	32	mV
High to low input voltage	V _{SHL}		-25	-13	-1	mV
[Oscillator]						
High-level output voltage	V _{OH(CR)}		2.9	3.2	3.5	V
Low-level output voltage	V _{OL(CR)}		0.9	1.1	1.3	V
Oscillation amplitude			1.8	2.1	2.4	V
Oscillation frequency	f	R=300kΩ, C=1500pF		18.5		kHz
Temperature coefficient	Δf			0.1		%/°C
[Comparator]						
Output voltage	V _{OSC}	I _{OSC} =20mA			1.5	V
[Current limiter]						
Limiter1	V _{Rf1}		0.42	0.5	0.6	V
Limiter2	V _{Rf2}		0.4	0.44	0.48	V
Thermal shutdown temperature	TSD	Design target	150	180		°C
Hysteresis width	ΔTSD			30		°C
Low-voltage protection voltage	V _{LVSD}		7.5	8.1	8.7	V
Hysteresis width	ΔV _{LVSD}		0.45	0.6	0.75	V
[FG amplifier]						
Input offset voltage	V _{IO(FG)}		-10		+10	mV
Input bias current	I _{B(FG)}		-1		+1	μA
High-level output voltage	V _{OH(FG)}	I _{FG} =-2mA	5.6	6.2	6.8	V
Low-level output voltage	V _{OL(FG)}	I _{FG} =2mA		1	1.5	V
FG input sensitivity		10×Gain	5			mV
Schmitt width at next stage				16		mV
Operating frequency range					5	kHz
Open-loop voltage gain			60			dB
[Speed Discriminator]						
High-level output voltage	V _{OH(D)}			4.7		V
Low-level output voltage	V _{OL(D)}			0.3		V
Maximum clock frequency		T _J =100°C	1.05			MHz
Count pulses			2044	2046	2048	
[Integrator]						
Input offset voltage	V _{IO(INT)}		-10		10	mV
Input bias current	I _{B(INT)}		-0.4		+0.4	μA
High-level output voltage	V _{OH(INT)}		3.7	4.3	4.9	V
Low-level output voltage	V _{OL(INT)}			0.8	1.2	V
Open-loop gain			60			dB
Gain-bandwidth product				1.6		MHz
Reference voltage			-5%	V ₅ /2	+5%	V
5V supply	V ₅		4.6	5	5.4	V
[Lock detection]						
Low-level output voltage	V _{OL(LD)}	I _{LD} =10mA			0.5	V
Locking range				±3.125		%

Block Diagram

Description of Terminal Function

Pin Name	Pin No.	Description
IN ⁺ 1, IN ⁻ 1	19, 20	OUT1: Hall element input terminals for Phase 1. "H" logic is the state when IN ⁺ > IN ⁻ .
IN ⁺ 2, IN ⁻ 2	17, 18	OUT2: Hall element input terminals for Phase 2. "H" logic is the state when IN ⁺ > IN ⁻ .
IN ⁺ 3, IN ⁻ 3	15, 16	OUT3: Hall element input terminals for Phase 3. "H" logic is the state when IN ⁺ > IN ⁻ .
OUT1	5, 6	Output terminals for Phase 1. U...source
OUT2	7, 8	Output terminals for Phase 2. L...sink
OUT3	9, 10	Output terminals for Phase 3.
V _{CC}	2	Power supply for everything, except outputs.
V _M	12	Power supply for outputs.
R _f	11	Output current detection terminal. An R _f is connected across this terminal and GND, and the output current is detected as voltage.
CR	3	Sets the oscillating frequency of the switching regulator.
OSC	1	Outputs duty-controlled pulses. Open-collector output.
INT. OUT	24	Integrator output terminal (speed control terminal). Varies the switching regulator output voltage.
INT. IN	25	Integrator input terminal.
D. OUT	23	Speed discriminator output terminal. Goes LOW when the specified speed is exceeded.
C	4	Suppresses ripples in the motor current during operation of current limiter 2.
LD	22	Lock detection terminal. Goes LOW when the motor rotation speed is within the locking range.
FG IN ⁻	27	FG pulse input (Start/Stop control) terminal.
FG IN ⁺	26	FG pulse input (4V supply) terminal.
FGOUT	28	FG amp output terminal.
X' tal	21	Crystal oscillator terminal to which a crystal resonator is connected.
5V	13	5V supply terminal.

- Specifications of any and all SANYO products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- SANYO Electric Co., Ltd. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any and all SANYO products described or contained herein fall under strategic products (including services) controlled under the Foreign Exchange and Foreign Trade Control Law of Japan, such products must not be exported without obtaining export license from the Ministry of International Trade and Industry in accordance with the above law.
- No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written permission of SANYO Electric Co., Ltd.
- Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. When designing equipment, refer to the "Delivery Specification" for the SANYO product that you intend to use.
- Information (including circuit diagrams and circuit parameters) herein is for example only ; it is not guaranteed for volume production. SANYO believes information herein is accurate and reliable, but no guarantees are made or implied regarding its use or any infringements of intellectual property rights or other rights of third parties.
