

# **Broadband IF Driver Amplifier** 50 - 2500 MHz

#### Features

- Low Cost Plastic SOT-89 Package
- **Broadband Operation**
- +38.5 dBm Output Intercept Point @ 250 MHz
- +19 dBm Output P1dB
- High Efficiency
- 50 Ω Input / Output Match
- 18 dB Typical Gain

#### Description

M/A-COM's MAAMSS0017 driver amplifier is a GaAs MMIC which exhibits high OIP3 as well as high gain and low power consumption in a low-cost SOT-89 surface mount plastic package.

The MAAMSS0017 employs a monolithic single stage design featuring a convenient 50  $\Omega$  input / output impedance that minimizes the number of external components required. The device runs off a single +5 volt supply and draws 70 mA typically.

The MAAMSS0017 is fabricated using M/A-COM's iHBT process to realize low current and high power functionality. The process features full passivation for increased performance and reliability.

#### Ordering Information<sup>1</sup>

Part Number	Package
MAAMSS0017TR	1000 Piece Tape and Reel
MAAMSS0017TR-3000	3000 Piece Tape and Reel
MAAMSS0017SMB	Sample Board (Includes 5 Samples)

1. Reference Application Note M513 for reel size information.

#### Maximum Operating Conditions<sup>2</sup>

Parameter	Maximum Operating Conditions
Junction Temperature	125°C
RF Input Power	14 dBm

2. Operating at or within these conditions will ensure MTTF > 1 x 10<sup>6</sup> hours.

M/A-COM Inc. and its affiliates reserve the right to make changes to the

no warranty, representation or guarantee regarding the suitability of its

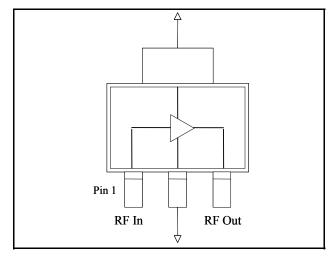

product(s) or information contained herein without notice. M/A-COM makes

products for any particular purpose, nor does M/A-COM assume any liability whatsoever arising out of the use or application of any product(s) or

# MAAMSS0017 V4

#### Functional Schematic

#### **Pin Configuration**

Pin No.	Function	Pin No.	Function
1	RF In	3	RF Out/Bias
2	GND		

#### Absolute Maximum Ratings <sup>3,4</sup>

Parameter	Absolute Maximum	
RF Input Power <sup>5</sup>	15 dBm	
Voltage	6 Volts	
Junction Temperature <sup>6</sup>	+150°C	
Operating Temperature	-40 °C to +85 °C	
Storage Temperature	-65 °C to +150 °C	

3. Exceeding any one or combination of these limits may cause permanent damage to this device.

4. M/A-COM does not recommend sustained operation near these survivability limits.

5. The MAAMSS0017 is designed to operate optimally at 10 dB backed off from its output P1dB. Driving the device at higher power levels could degrade performance.

6. Thermal Resistance = 110°C/W.

## **Operating the MAAMSS0017**

The MAAMSS0017 can be damaged by electrostatic discharge (ESD). Use proper ESD control techniques when handling this device. To operate the MAAMSS0017, follow these steps.

- 1. Apply  $V_{CC}$  (5.0 V).
- $2. \quad Set \ \mathsf{P}_{\mathsf{IN}}.$
- 3. Turn off in reverse order.
