MAAP-000069-PKG003 Rev — Advance Information

#### **Features**

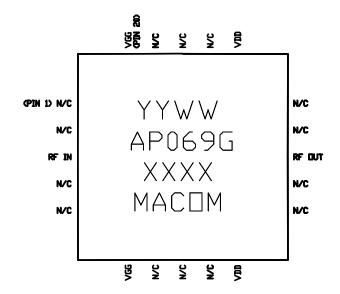

- ◆ 2 Watt Saturated Output Power Level
- ◆ Variable Drain Voltage (6-10V) Operation
- MSAG<sup>™</sup> Process

### **Description**

The MAAP-000069-PKG0003 is a 4-stage 2 W power amplifier with on-chip bias networks in a 20 lead MLP package, allowing easy assembly. This product is fully matched to 50 ohms on both the input and output. It can be used as a power amplifier stage or as a driver stage in high power applications.

Each device is 100% RF tested to ensure performance compliance. The part is fabricated using M/A-COM's GaAs Multifunction Self-Aligned Gate (MSAG) Process.

M/A-COM's MSAG™ process features robust silicon-like manufacturing processes, planar processing of ion implanted transistors and multiple implant capability enabling power, low-noise, switch and digital FETs on a single chip. The use of refractory metals and the absence of platinum in the gate metal formulation prevents hydrogen poisoning when employed in hermetic packaging.

### **Primary Applications**

- ♦ Point-to-Point Radio
  - ♦ 7, 8 and 11 GHz Bands
