LED..O..M Series Diffused On-Axis Lights

Uniform Lighting for Machine Vision Applications

Features

- Diffused on-axis illumination for uniform lighting on specular surfaces
- Five light colors
- Two sizes available
- Continuous or strobed operation selectable via sensor software
- Glass dust-covered models available (see table below for models ending in -D)
- Bracket options available

Models

* Extension cables with flying leads are available for connecting to models other than <i>Presence</i> PLUS P4.						

** Optical glass anti-reflective coating, both sides

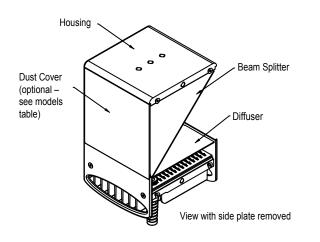

Specifications

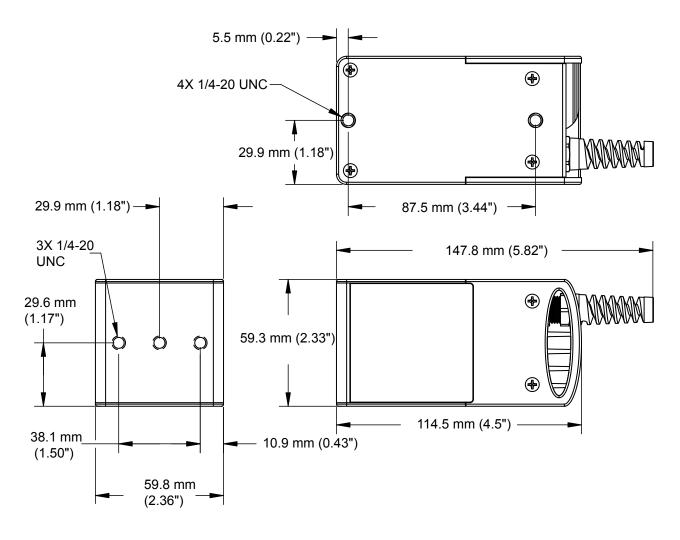

Feature	Description			
Light Source	Visible red LED (630 nm), Infrared (880 nm), Blue (470 nm), White (5500 K), or Green (530 nm), depending on model			
Supply Voltage and Current	24V dc \pm 10% 500 mA max., 125 mA max for 50 mm models. Direct connect to <i>Presence</i> PLUS P4 sensor operating at 24V dc only.			
Construction	Housing: Aluminum with black anodizing Beam Splitter: Optical glass with optical coatings on both sides. Diffuser: High-precision cast acrylic Dust Cover: Optical glass with broadband anti-reflective coating (425 – 675 nm) (some models)			
Useful Life	When operated within specifications, output will decrease less than 20% after 10,000 hours and less than 30% after 20,000 hours (based on continuous operation). NOTE: Actual useful life of strobed lights depends on duty cycle.			
Operating Conditions	Temperature: 0° to +50° C (+32° to +122° F) Maximum Relative Humidity: 90% at 50° C (non-condensing)			
Cleaning Instructions	Regularly remove any dust, dirt, or fingerprints from the light source: 1. Blow off dust using anti-static compressed air. 2. If necessary, use a lens cloth and lens cleaner or window cleaner to wipe off remaining debris. Do not use any other chemicals for cleaning.			
Installation Note	Before installing an on-axis light, it is recommended that the listed ambient light filter be installed behind the camera lens. The filter improves image quality by reducing unwanted ambient light. 100 mm models: 50 x 50 mm suggested field of view and 25 mm minimum suggested stand off 50 mm models: 25 x 25 mm suggested field of view and 25 mm minimum suggested stand off
