Description

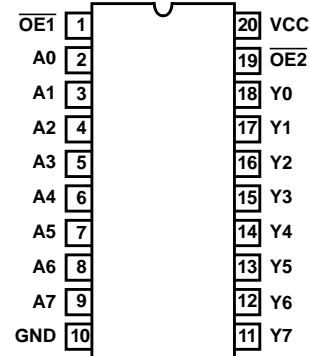

The Intersil HCTS541MS is a Radiation Hardened non-inverting octal buffer/line driver, three-state outputs. The output enable pins (OEN1 and OEN2) control the three-state outputs. If either enable is high the outputs will be in the high impedance state. For data output both enables (OEN1 and OEN2) must be low.

The HCTS541MS utilizes advanced CMOS/SOS technology to achieve high-speed operation. This device is a member of radiation hardened, high-speed, CMOS/SOS Logic Family.

The HCTS54 is supplied in a 20 lead Ceramic flatpack (K suffix) or a SBDIP Package (D suffix).
