

Piezoelectric Sounders External Drive Pin Type

Now microcomputers are widely used for microwave ovens, air conditioners, cars, toys, timers, and other alarm equipment. Externally driven piezoelectric sounders are used in digital watches, electronic calculators, telephones and other equipment. They are driven by a signal (ex: 2048Hz or 4096Hz) from an LSI and provide melodious sound.

Features

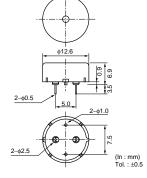

- 1. Low power consumption
- 2. No contacts therefore, no noise and highly reliable

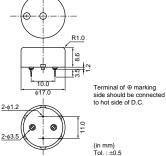

Applications

- 1. Telephone ringers
- 2. Various office equipment such as PPCs, printers and keyboards
- 3. Various home appliances such as microwave ovens
- 4. Confirmation sound of various audio equipment

Piezoelectric Sounders External Drive Pin Type Taping

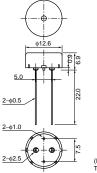

Taking advantage of extensive automatic insertion design technology and materials experience, Murata has developed standard taping type piezoelectric sounder.

This Murata technology supports labor and cost saving activities.

Features

- 1. High and stable mountability
- 2. Ammo packaging
- 3. Minimum quantity (order in sets only): 500 pcs.

muRata

Piezoelectric Sounders External Drive SMD Type

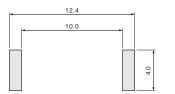

Taking advantage of extensive acoustic and mechanical design technology and high performance ceramics, Murata has developed SMD piezoelectric sounders that suite the thin, high-density design of electronic equipment.

Features

- 1. High S.P.L. and clear sound
- 2. Reflowable
- 3. Tape & Reel supply
- 4. Minimum quantity (order in sets only): 1,000 pcs.

Piezoelectric Sounders (External Drive) Circuit/Notice

Circuit

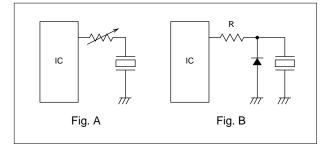

■ Notice (Soldering and Mounting)

Washing of the component is not acceptable, because it is not sealed.

■ Notice (Handling)

- 1. The component may be damaged if mechanical stress exceeding specifications is applied.
- Take care to protect operating circuit from surge voltage resulting from excessive force, falling, shock or temperature change.
- If DC voltage is applied to the component, silver migration may occur. Please pay full attention to avoid subjecting the component to DC voltage for long periods.
- The resistor should be used as shown in Fig. A.
 A suitable resistance value should be chosen, preferably 1kΩ to 2kΩ. Instead of this measure, a diode may also be applied as shown in Fig. B.

5. Avoid excessive pulling of lead wire because wire may break or soldering point may come off.
